Introduction

Purpose of the Student Handbook

The information in this handbook supplement that given in the University's General Catalog and is provided to facilitate students' progress through the nursing program. This handbook is available on the Nursing Program web page at http://nursing.csuci.edu. This handbook may be printed if desired. Every attempt is made to accurately reflect the policies of the program Changes in policies will be posted on the nursing program web page.

School of Nursing Approval/Accreditation:

The nursing program is approved by the California Board of Registered Nursing (BRN). The program is nationally accredited through the Commission on Collegiate Nursing Education (CCNE), the national accreditation agency of the American Association of Colleges of Nursing (AACN).

The accreditation agency is:

Commission on Collegiate Nursing Education
One Dupont Circle NW, Suite 530
Washington, DC  20036-1120
(202) 887-8176
http://www.aacn.nche.edu

The state accreditation agency is:

Board of Registered Nursing
El Monte Office
1180 Durfee Avenue Suite 120
El Monte, CA 91733
(626) 575-7080
http://www.rn.ca.gov/

Nursing Programs Offered:

The Nursing Program offers the following degree programs;

Baccalaureate of Science in Nursing (BSN)

1. BSN for the generic (basic) student
2. RN - BSN for the returning RN student
3. ADN to BSN fast track
4. LVN 30 unit option
CSUCI Mission Statement

Placing students at the center of the educational experience, California State University Channel Islands provides undergraduate and graduate education that facilitates learning within and across disciplines through integrative approaches, emphasizing experiential and service learning, and graduates students with multicultural and international perspectives.

Nursing Program Mission Statement

The mission of the faculty and staff of the Nursing Program is to prepare students for a career in professional nursing that focuses on assisting patients/clients to achieve health or health-related goals and to transition from a disease-oriented to a health oriented system of health care. Faculty assist student who acquire general knowledge from the sciences and arts and specific knowledge and skills from nursing practice and theories to assume a nursing leadership roles. Theses professional nursing roles are practiced as a provider of care, teacher, advocate, coordinator of care and member of the profession. Faculty articulate a philosophy of nursing in which nurses provide health care for culturally and ethnically diverse individuals, groups, families, and communities in hospitals, homes, and community-based settings.

CSUCI Nursing Program Philosophy

The Nursing program's philosophy is congruent with the mission of the University and Neuman’s conceptual model (Neuman, B., 2011 *The Neuman Systems Model*, 5th Edition Saddle River, NJ; Pearson) upon which the curriculum is based. The Neuman Systems model represents a comprehensive systems-based conceptual framework for nursing. The philosophical statements regarding person, environment, health, nursing, and nursing education are as follows (Figure 1):
Figure 1  The Neuman Systems Model. Original diagram copyright © 1970 by Betty Neuman.
Philosophy of Person

The person may be defined as an individual, group, family or community and is the client recipient of health care. Within the Neuman systems model the client is represented within the system’s perspective, wholistically and multi-dimensionally. The focus of nursing is on the client/client system which is a composite of variables (physiological, psychological, socio-cultural, developmental and spiritual), each of which are a sub-part of all the parts, forming the whole client. The client is viewed as a system, and thus the term can be used interchangeably with client/client system. The client as a system is composed of a core or basic structure of survival factors and surrounding protective concentric rings. The concentric rings are composed of similar factors, yet serve varied and different purposes in retention, attainment, or maintenance of system stability and integration or a combination of these. The client is considered an open system in total interface with the environment.

The client is seen as possessing a central core structure (physiological, psychological, socio-cultural, developmental and spiritual) consisting of basic survival factors common to the species, such as variables contained within it, innate or genetic features and strengths and weaknesses of the system parts. There are, surrounding the central core, a line of resistance or protective mechanisms to protect the basic structure or client/client system integrity. Surrounding that core is the normal line of defense which is the usual wellness state.

Philosophy of Environment

The concept of the environment is a central theme to the discipline of nursing and is reflected in the Neuman conceptual frameworks. The environment, according to Neuman, is broadly defined as all internal and external factors or influences surrounding the identified client or client system. The client is surrounded by a flexible line of defense that acts as a protective buffer system for the client’s normal state. The client may influence or be influenced by environmental forces either positively or negatively at any given point in time. A particular stressor with a negative outcome for a client at a particular point in time may not always be noxious. The adjustment of the system may alter the client’s response pattern. Input, output, and feedback between the client and the environment is circular in nature, in which the client and environment have a reciprocal relationship. This interaction produces outcomes which are corrective or regulatory for the system.

Single or multiple stressors have the possibility of disrupting the normal line of defense, causing the client to present with symptoms of illness. In all lines of defense and resistance there are elements which are similar, but with specifics functionally related to the five client variables (physiological, psychological, socio-cultural, developmental and spiritual).

The internal environment consists of all forces or interactive influences internal to or contained solely within the boundaries of the client/client system and correlated with intrapersonal factors or stressors. The external environment consists of all forces or interactive forces external to or existing outside the defined client/client system and correlates with both the models inter-and extra personal factors or stressors. In the model, environmental exchanges are identified as to their nature and possibility for influencing changes in the client’s perceived state of wellness.

Another important environment identified by Neuman is the created environment; this concept represents the open system exchanging energy with both the internal and external environment.
This created environment, developed unconsciously by the client, is a symbolic expression of the system’s wholeness. In other words, it acts as an immediate or long-range safe reservoir for existence or maintenance of system integrity expressed consciously or unconsciously. This created environment is dynamic and represents the client’s unconscious mobilization of all systems variables (particularly the psycho-sociocultural) in which the mobilization of these systems is inherently purposeful. Nursing’s role is to evaluate internal and external factors affecting the client and the potential interrelationships that these variables have on the client’s state of health.

Philosophy of Health

Health is a continuum of wellness to illness, dynamic in nature and one that is constantly subject to change. Optimal wellness, or stability, indicates that the total system needs are met. A reduced state of wellness is the result of unmet systemic needs. The client is in a dynamic state of either wellness or illness, in varying degrees, at any given point in time. Variances from wellness or varying degrees of instability are caused by stressor invasion of the normal line of defense. The goal of nursing is to maximize optimal system stability or health of the client.

Philosophy of Nursing

Nursing is a unique profession concerned with all variables affecting clients in their environment. The nurse works in keeping the client systems stable. He/she accomplishes stability through accuracy in both assessing the effects and possible effects of environmental stressors and assisting in the client adjustment required for optional level wellness. Nursing actions are initiated to best retain, attain, and maintain optional client health or wellness using primary, secondary and tertiary preventions as interventions.

Nursing is a health related profession which utilizes evidence-based practice to guide clinical decisions and interventions. As an applied science, nursing utilizes theories from its own discipline, as well as other sciences, to explain phenomena encountered in client care and to provide rationale for and to explicate appropriate nursing interventions in particular situations. Theory and research are essential components in the advancement of nursing as a professional discipline.

A baccalaureate program in Nursing prepares generalists who, by utilizing a comprehensive approach to health care, can assist individuals, families, groups, and communities in primary, secondary and tertiary prevention. Generalists practice in a variety of health care settings, including the hospital or acute care settings, long term care settings such as rehabilitation, hospice and in assisted living environments. Nurses also practice in the community, including community clinics, public health service sites, home health and respite care settings. The essential roles of professional nursing are as a client advocate, teacher, provider of care, researcher, and as a practitioner who coordinates care and/or collaborates with other health professionals. In these roles, and as a member of the profession, nurses engage in making clinical judgments, in forming policy, and in the design and implementation of plans for the improvement of health care services. Members of the profession are expected to act responsibly, always mindful of public trust. Self-regulation to assure quality in performance is at the heart of Nursing’s relationship with society.
Philosophy of Nursing Education

The California State University Channel Islands mission is to place students at the center of the educational experience and provide undergraduate and graduate education that facilitates learning within and across disciplines through integrative approaches, emphasizing experiential and service learning and graduating students with multicultural perspectives.

The Nursing program, as part of the university, resides in a community populated by people from multiple ethnic and cultural backgrounds. A goal of the nursing program will be to recruit a student population which is representative of the ethnic and cultural diversity in the local community and to prepare its students to serve the nursing needs of this culturally diverse society. Students, endowed with the capacity for self-direction, are ultimately responsible for their own learning and self-development. It is anticipated that students will vary in aptitude, learning style, motivation, cultural orientation and other individual differences. Assessment of these factors provides the faculty member with a basis for the selection of the most appropriate teaching-learning strategies and for referral to the multiple campus resources and services available, should the student have academic or personal issues needing support and/or assistance.

The foundation for understanding the self and others will be provided through a balanced program of arts and humanities, social and biological sciences, and professional courses. Critical thinking will be developed through application of problem-solving methods in clinical practice, where analysis, including the weighing of alternatives in selecting a course of action, will be applied. Essential to the preparation of the professional nurse is the development of communication skills, cultural competency, professional values, ethical principles, and the technical expertise in assessment and clinical intervention. Effective social interaction, therapeutic communication and mastery of the technical skills are among the fundamental aptitudes needed by the professional nurse. An essential component of comprehensive nursing care is a concentration on health promotion and disease prevention.

The role of service learning and service to the community will be emphasized with projects and learning experiences which concentrate on giving back to the community. Service learning is a teaching and learning approach that integrates community service with academic study to enrich learning, teach civic responsibility and strength communities while students engage in reflective activities concerning the benefits of the experience. Such service learning activities will provide the basis for the nurses' professional commitment to volunteerism as a graduate. The role of the faculty member will be to serve as an instructor, role model, preceptor, resource person, motivator and facilitator. Faculty members will be expected to combine teaching with other professional activities, such as ongoing clinical practice, scholarly publications and presentations, and research. Establishment of partnerships with local health care agencies will promote the development of faculty practice opportunities, collaborative research projects and joint appointments.

Goals of the Baccalaureate Program

The primary goals of the baccalaureate nursing program are to prepare professional nurse generalists who collaborate with other members of the health care team, take leadership roles in providing care to individuals, families and groups in institutional and community settings, and establish the foundation for graduate education in nursing. The curriculum is designed to stimulate
self-directed study, creative expression and understanding of self and others. Critical thinking, synthesis and application of concepts drawn from the arts and humanities, natural, social, and medical sciences, and personal and professional ethics and accountability will be stressed in the nursing program.

Program Objectives of the Baccalaureate in Nursing Degree

The overall objective of the Bachelor of Science in Nursing will be to prepare students to become successful practicing nurses. This will be accomplished by assisting them to meet the following:

- Function within the professional nursing roles as provider and a coordinator of care, a health educator, an advocate and as a member of the nursing profession in a variety of institutional settings.
- Collaborate as a member or as a leader of a health care team in the planning, implementation and improvement of health care services, consistent with the health needs of a diverse and multicultural society.
- Follow the nursing process by assisting clients, families and communities to promote an optimum level of wellness, sustain life, and recover from disease or injury in acute, long term care institutional and community settings.
- Function as a successful professional by a commitment to self-growth and lifelong learning.
- For the generic students, meet the eligibility requirements to successfully pass the National Council of State Boards of Nursing (NCLEX) examination.
- For generic and RN to BSN students meet the eligibility requirements for the California Public Health Nurse Certificate.

Outcome Criteria of the Baccalaureate Program

The program outcomes criteria for the baccalaureate program have been developed to establish the parameters of measurable indicators of student success. The program outcome criteria include acquisition of content and clinical practice standards that are operationalized into five specific nursing roles suggested by the American Association of Colleges of Nursing AACN (Standards for Accreditation of Baccalaureate Education for Professional Nursing Practice, April, 2009). These nursing roles are: provider of care, teacher, advocate, coordinator of care, and member of the nursing profession. Two levels of program outcome criteria have been developed based on these roles. Generic students are expected to meet the Level I outcome criteria after successful completion of sophomore, and first semester junior level generic nursing courses. Since these Level I outcome criteria represent a basic minimum level of competencies, RN transfer students are admitted to the program with the expectation that they are able to meet these, and in some cases, exceed these outcome criteria. This expectation is based on their prior educational experience and maturation, as a result of their clinical practice.

The Level II outcome criteria reflect a level of competence beyond the minimum level of competencies and represent a level of performance expected by a baccalaureate graduate nurse. These outcome criteria are consistent with the competencies of the baccalaureate nurse suggested by the AACN (Standards for Accreditation of Baccalaureate Education for Professional Nursing Practice, April,
Both generic and transfer RN students are expected to meet the Level II outcome criteria at the successful completion of specific senior nursing courses in the baccalaureate program.

The organizational framework of the CSU Channel Island’s nursing program depicts the core of the model as the Client System with the circular rings of environment and culture expressed as the internal and external stressors that influence the client. This is depicted graphically in the organization framework diagram which follows. The role of health on the health illness continuum is portrayed as the ability of the client to maintain health to maintain system stability. In depicting the role of the nurse the model uses the concepts of the art and science of caring, evidence-based practice, nursing science, technology and nursing process in carrying out nursing role. The roles of the nurse are further defined as follows according to first and second level curriculum.

**Level I: Basic Practice Level Outcome Criteria**

Given an individual, family, and individual with simple variances from wellness, the student will:

**As a Provider of Care**

1. Demonstrate skills in physical assessment and obtaining a health history, in written and verbal communication for planning and documenting patient care, and in the provision of standard direct and indirect therapeutic nursing interventions.

2. Utilize the nursing process and research-based knowledge to develop, implement and evaluate a plan of care, in cooperation with other members of the health care team, within structured health care delivery situations.

3. Perform nursing interventions that reflect critical thinking ability based on the ability to integrate concepts from biological, behavioral, natural, and nursing science to correctly identify client health deviations.

**As a Teacher**

1. Demonstrate knowledge of basic principles of the teaching-learning process.

2. Identify client’s learning needs, capabilities and limitations, select appropriate information, materials and strategies based on standardized teaching protocols, and evaluate and document outcomes relative to client education.

**As an Advocate**

1. Provide culturally competent and sensitive care that is respectful of the client’s privacy, and preserves the client’s confidentiality.

2. Identify rights and responsibilities of the client as health care consumer, and support fairness and non-discrimination in the delivery of care.
3. Participate in client care conferences, communicating the client’s needs and preferences to other health care providers.

As a Coordinator of Care

1. Articulate one’s own scope of practice as it relates to coordination of patient care.

2. Identify the roles of other health care providers and communicate appropriately with them to facilitate optimum care.

3. Compare and Contrast the relationship between standards of nursing care outcomes, quality assurance monitoring, and the provision of cost-effective services to clients.

As a Member of the Profession

1. Explain the standards and scope of professional nursing practice and the role of major nursing organizations and regulatory bodies.

2. Develop personal goals for professional development and assess own capabilities and limitations, accepting accountability for one’s own actions.

3. Demonstrate understanding of the limits of one’s own scope of practice and adhere to practice regulations.

Level II: Summative Professional Level Outcome Criteria

Given a client (individual, family, group, aggregate or community) with complex stressors across multiple settings, the student will:

As a Provider of Care

1. Demonstrate the knowledge and skills to holistically evaluate client needs across the lifespan including a spiritual, cultural, social, cognitive and psychological assessment and a comprehensive physical examination.

2. Determine client optimal level of wellness, and interpret and utilize quantitative data via a scientific process for problem solving. Develop, implement, and evaluate a plan of care in collaboration with the client and other health care providers which promotes maximum health and well-being.

3. Demonstrate the ability to use professional communication within the client-nurse relationship and mastery of core clinical skills and techniques required for the delivery of safe and competent nursing care.
As a Teacher

1. Demonstrate the ability to comprehensively assess the predictive risk factors and the adequacy of an individual’s health information that may influence the health and well-being of a client.

2. Develop, implement and evaluate a comprehensive health education plan for a specific client that includes strategies for health promotion, risk reduction, and disease prevention across the life span.

3. Incorporate client strategies to recognize and manage the key physical and psychological symptoms related to disease states and/or the therapeutic regimen in the teaching plan.

As an Advocate

1. Develop a plan of care in partnership with the client and their families, and respect the right of the client to make decisions about health care but provide information so clients can make informed choices.

2. Inform clients of their rights and responsibilities as health care consumers continuously monitor their ability to exercise their rights and make decisions, and act as their spokesperson if needed.

3. Assume a leadership role by working with other health care professionals who are brokering and negotiating for client needs and preferences, in keeping with the provision and delivery of the plan of care.

As a Coordinator of Care

1. Design, coordinate, manage and evaluate the outcomes of nursing care for clients from vulnerable populations, to maximize independence and quality of life.

2. Direct, organize and evaluate outcomes of care by other health care providers, and secure appropriate community resources to provide cost-effective services.

3. Delegate and supervise the nursing care given to the client by others while retaining accountability for the quality of care within one’s own scope of practice.

As a Member of the Profession

1. Incorporate practice standards and accountability within the legal and ethical standards of the profession of nursing.

2. Negotiate and advocate for the role of the professional nurse as a member of the interdisciplinary health care team.

3. Participate in professional organizations to continue personal development and for the advancement of the profession.
General Catalog

Information about admissions requirements, registration, student activities and academic policies is available in the university catalog via the University website at http://www.csuci.edu. The general catalog contains official policies and regulations about admissions, fees, refund policies, student services, policies and procedures for graduation. The requirement for undergraduate programs and descriptions of all university courses with their pre- and co-requisites are included. Familiarity with university rules and regulations published in the catalog is the responsibility of the student. Student should retain a copy of the catalog under which they were admitted for future reference.

General Admission Information

The University functions on the semester system with two fifteen week semesters (fall and spring) and two summer sessions (five week and six week).

Admissions

The procedures for admission to the university can be found in the general catalog and/or on the university web site. For university admissions see the enrollment services website at http://www.csuci.edu. The student should also access the nursing program website at http://nursing.csuci.edu for detailed information concerning admission to the university and various nursing academic programs.

Special Nursing Admissions Information: Admissions as a nursing major is a two-step process:

1. Apply for admission to the university
2. Apply for admission to the nursing program

Admission to the University does not guarantee admission into any of the specific nursing programs available at CSU Channel Islands. There are separate supplemental admission processes required to enter each of the proposed nursing programs. Students are referred to the Nursing Program website for specific admission information for the generic BSN, Track 1, LVN 30 Unit Option, LVN to RN and RN to BSN programs. Applicants to the university will be admitted as pre-nursing students until they have been evaluated by the nursing admissions committee and admitted into the nursing program. Students admitted as pre-nursing students will have two academic years to either be admitted into the nursing program or change their major.
Supplemental Criteria to Determine Admission of Generic/Basic Track 1 Students

In the 2006-07 academic year nursing was declared an impacted program by the CSU Chancellor’s Office. An impacted program has more qualified students seeking admissions to the program than can be accommodated given the allocated resources. To determine which students will be admitted to the generic/basic Track 1 program, student applicants will be rank ordered for admission according to the approved supplemental criteria. The following is the point structure approved by the Chancellors Office up to 49 possible supplemental points can be earned. Students must still meet the minimum prerequisite course requirement for admission to be eligible for admission to the Generic/Basic Program. RN to BSN, LVN 30 unit option are exempt from supplemental criteria.

Student applicants will be rank ordered for admission according to the following point structure. Up to 49 possible supplemental criteria points can be earned. Students must still meet the minimum prerequisite course requirements for admission to be eligible for admission to the Generic/Basic Program. Points will be awarded based on coursework and volunteer/work experience hours completed at the time nursing application is submitted.

Grade point average in Pre-Nursing Core course or equivalents: 10 points maximum

The cumulative grade point (GPA) is required for six of the eight Pre-Nursing Core courses (or their equivalents):

<table>
<thead>
<tr>
<th>Course #</th>
<th>Class</th>
<th>Course #</th>
<th>Class</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 210</td>
<td>Human Anatomy &amp; Physiology I</td>
<td>CHEM 110</td>
<td>Chemistry of Life</td>
</tr>
<tr>
<td>BIOL 211</td>
<td>Human Anatomy &amp; Physiology II</td>
<td>COMM 101</td>
<td>Public Speaking</td>
</tr>
<tr>
<td>BIOL 217</td>
<td>Medical Microbiology</td>
<td>ENGL 105</td>
<td>Composition and Rhetoric I</td>
</tr>
</tbody>
</table>

The GPA is computed by averaging the grades earned in the courses with all courses equally weighted. If a course is repeated, both grades are averaged in computing GPA. Prerequisites may be in progress during semester application is submitted and will be calculated as a B pending receipt of final transcript. Courses cannot be taken more than twice. The minimum acceptable GPA is 2.5.

English Language Proficiency: 6 points maximum

Completion of the standardized Test of Essential Academic Skills (TEAS) version V produced by Assessment Technologies Inc (ATI) is mandatory for all applicants. Points will be assigned for the earned scores for reading and English skills according to the following point structure. Students are expected to score above the 40th percentile in all four content areas (reading, English, math, and science), but points are awarded on percentile score in Reading, English and Math.

*Point Subscale scores for English & Reading:*

<table>
<thead>

</tbody>
</table>

Proficiency in a Second Language: 6 points maximum

Six (6) points are earned by meeting any of the following criteria in Spanish. A maximum of four (4) points are earned for meeting the following criteria in one or more languages other than Spanish.

- Completion (not in progress) of the equivalent of an intermediate-level course in a language other than English at the college level with a grade of C or better. This course must have been completed within five (5) years of the proposed semester of admittance. (Must be completed by February deadline).
- Completion of the equivalent of three (3) years of high school second/foreign (non-English) language or American Sign Language (ASL) with a grade of B or better. The last year or equivalent must have been completed within three years of the proposed semester of admittance.
- Successfully receiving a score of 3 (three) or better on the Advanced Placement (AP) Foreign Language Examination in Language or Literature (e.g., Spanish Language or Spanish Literature). (Must have completed within five (5) years of the proposed semester of admittance.
- Successfully receiving scores of 68 (scaled) and 78 (raw) on the College Board CLEP (College-Level Examination Program).
- A diploma of high school equivalency of one semester of course work from a university outside the U.S. from an institution in which the instruction of the courses completed was provided in language other than English.
- Native Speakers must provide verification of language proficiency. Proof must be in writing, by one of the following, clergy, employer, community leader or faculty.
Previous Education: (4 points)
Previously completed a baccalaureate or higher degree: 4 points

Work Experience: (4 Points)
Military Service, discharged under honorable conditions within the last five years: 4 points
Or
Previous experience in a health care setting as an employee, minimum of 200 hours: 4 points
Or
Previous volunteer experience in a related health care setting:

<table>
<thead>
<tr>
<th>Hours</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>50-100</td>
<td>1 point</td>
</tr>
<tr>
<td>101-200</td>
<td>2 points</td>
</tr>
<tr>
<td>&gt;200</td>
<td>3 points</td>
</tr>
</tbody>
</table>

Students may use work experience as a volunteer or employee but not both.
Acceptable work experience includes employment in fields such as: Licensed Vocational Nurse (LVN), Certified Nursing Assistant (CNA), Respiratory Therapist (RT), Emergency Medical Technician (EMT), Medical Assistant (MA) or a Psychiatric Technician. Other work experience will be evaluated on an individual basis.

Local qualifying volunteer opportunities include but are not limited to: TLC Home Hospice (Loving Heart Hospice Foundation) and COPE Health Solutions Clinical Care Extender Internship (St. Johns Regional Medical Center, St. John’s Pleasant Valley Hospital).

Previous work experience or volunteer service must be verified by a letter from the employer or volunteer coordinator and include the amount of volunteer hours served, by the February deadline.

Residency in preferred geographic areas: 4 points

Residency will be based on the last school attended within the following college/university and public school districts. The same geographical boundaries apply to non-public schools.

Residency in Ventura County, Southern Santa Barbara County (Goleta, and Santa Barbara), Northern Los Angeles County (Agoura, Oak Park, Westlake and areas in Las Virgenes School District)

Or

Current CSUCI student: 6 points

High school participation in regional health science or bioscience academy or Nursing Pipeline Program: 2 points maximum

High school students who have successfully completed a regional health or bioscience academy or have successfully completed a nursing pipeline program as validated by a letter of recommendation from the program director/academic director or lead instructor of the program or academy.
Pre-Nursing Course Admission Requirements

The following CSU eight pre-nursing core classes have been adopted by all CSU nursing programs. A grade of C (2.0) or better is required in each of these pre-nursing core courses for admission to all the CSU CI nursing programs leading to a baccalaureate degree. The only program exception that does not have to complete the pre-nursing core classes is the LVN to RN 30-unit option. This program does not lead to a Baccalaureate of Science in Nursing.

Pre-nursing Core Courses

Sciences
- Anatomy with a laboratory* (4 Units)
- Physiology with a laboratory* (4 Units)
- Integrated Chemistry with a laboratory** (4 Units)
- Microbiology with a laboratory (4 Units)

General Education
- College Math
- English
- Oral Communication
- Critical thinking

* Two combined courses in Anatomy and Physiology worth 8 units acceptable
** Course content covers inorganic, organic and essentials of biochemistry

Additional Program Specific Requirements

The additional admissions requirements for specific programs are as follows:

Generic/Basic Program:
This program leads to a baccalaureate in Nursing (BSN). Upon program completion, students are eligible to sit for the NCLEX State Board Exam (RN License Exam). This program is intended for students who do not hold an RN (Registered Nurse) or LVN (Licensed Vocational Nursing) license. In addition to ranking on supplemental criteria and completion of pre-nursing core classes the students admitted to the generic program must also meet the following:

Pre-nursing majors must apply and be accepted into the nursing program to be eligible for the lower division nursing courses and must have an overall GPA of 2.5 or greater in the nursing major prerequisite courses with no grade lower than a C (2.0)

Track 1: The Track 1 students complete all of their nursing courses at CSU Channel Islands. (See Appendix for Track 1 Curriculum). Students in this track complete two summer sessions the summer after the sophomore year is a five week and six week summer session. The summer after the junior year is a five week summer session.
LVN to BSN (Advanced Placement)
This program is for licensed vocational nurses (LVN’s) who have completed previous vocational nursing coursework at a regionally-accredited institution and have or be eligible to acquire a valid California LVN license. Upon program completion, students are eligible to sit for the NCLEX State Board Exam (RN License Exam). Additional requirements include:

1. LVN to BSN nursing students must complete the nursing major prerequisite courses with no grade lower than C (2.0).
2. Students pursuing the LVN to BSN program can be admitted to the University as pre-nursing majors to complete any nursing major courses and support courses. LVN to BSN Nursing students will be admitted to nursing courses on a space available basis.

Track II RN to BSN
This program is for licensed registered nurses (RN’s) who have completed previous nursing coursework at a BRN approved and regionally-accredited institution and has or will be eligible to acquire a valid California RN license. Additional requirements include:

1. RN to BSN students must complete the nursing major prerequisite courses with no grade lower than a C (2.0).
2. Students pursuing the RN to BSN Program can be admitted to the University as pre-nursing students to complete any nursing major prerequisite courses and support courses.
3. Students must be admissible to the University (pp 28-34, CSU Channel Islands 2011-2012 catalog).
4. Additional 6 units upper division support courses, 3 units upper division elective courses, 7 units GE elective or 4-year college level courses, and 6 units American Institutions.

Track II ADN to BSN Fast Track
This program is designed for the associate degree nurse who has successfully completed (or will complete by May) a nursing program at the ADN level and is seeking a Bachelor of Science Nursing. Additional requirements include:

1. ADN to BSN students must be eligible to take the NCLEX examination or have a nursing license to practice in the state of California.
2. Required to meet the 45 units of mandatory lower division GE courses either by transferable work or certification of GE requirements by previous institution.
3. Students must be admissible to the University (pp 28-34, CSU Channel Islands 2011-2012 catalog).
4. Additional 6 units upper division support courses, 3 units upper division elective courses, 7 units GE elective or 4-year college level courses, and 6 units American Institutions.

Additional Requirements for all Nursing Programs

1. Students in the nursing program must pass a physical health examination and demonstrate a sufficient immunization record consistent with that required of clinical placement agencies in utilized by CSU Channel Islands.
2. Students will be required to verify a negative background check including statewide, county and federal screening before placement in a healthcare agency for clinical assignments. Background checks are also required for persons seeking a nursing license in
the State of California. Students who have reason to believe that a background check would reveal a prior misdemeanor or felony conviction should seek to have these matters expunged from their record if possible and/or seek another career path. In addition students, upon applying to the BRN for Licensure will be required to declare any criminal activity which may affect their ability to be licensed. See the California BRN website for specifics on licensing information [http://www.rn.ca.gov/](http://www.rn.ca.gov/).

3. To be admitted to the nursing major, students will be expected to perform or with reasonable accommodations, demonstrate proficiency in specific core performance standards in the following five categories:

   a. Critical thinking ability sufficient for clinical judgment
   b. Interpersonal abilities sufficient to interact with individuals, families and groups
   c. Communication abilities sufficient for verbal and written interaction
   d. Physical ability to move from place to place and demonstrate manual dexterity and eye-hand coordination
   e. Demonstrate auditory, visual, tactile and olfactory ability sufficient to assess and monitor patients safely.*

* See a more detailed explanation on pp 40-41.

The academic advisor for the nursing program working with the Office of Disabled Student Services will assist students in determining what accommodations will be needed to enable students to meet these standards.

Criteria for Program Continuance

The criteria for continuance as a nursing major in any of the programs are as follows:

1. Students in the nursing major must attain grades of C (2.0) or better in all required nursing and preparatory to the major courses.
2. Nursing courses and preparatory courses for which the student earns less than a grad of C (2.0) may be repeated once with the consent of the instructor, but only on a space available basis.
3. Students in the nursing major must maintain good academic standing. Students on academic probation are not permitted to enroll in a nursing course until the probation has been removed.
4. The same core performance standards required for admission to the nursing major will be required for continuation.

Leave of Absence

Students who are in good academic standing may take a one semester leave of absence from CSUCI are considered continuing students and do not need to take any action in Office of Administration and Records. If the student misses one semester they must register for the next semester to avoid missing two consecutive semesters unless they have applied for a leave of absence (LOA) by completing an Academic Leave Form available in the Office of Admissions and Records. If the student is absent for two consecutive semesters without a LOA this will be considered a break in
matriculation that would necessitate reapplying for admissions, paying another application fee, and lead to a new catalog date and, potentially further academic requirements.

The nursing program is run in a cohort model and admissions is once a year. Students requesting a leave of absence, must be in good academic standing, and will be required to wait until the required course is offered to be considered for readmission. Readmission after a leave of absence will be on a space available basis. All students requesting a leave of absence must request such in writing using the nursing department LOA form and schedule an exit interview with the Director of the Nursing Program.

Exiting the Program

Students who exit the program, for any reason, must schedule an exit interview with the nursing program director. Readmission is on a space available basis.
Required Curriculum

There are 47 units of general education units. Students should refer to the university catalog for a complete discussion of general education requirements. Generic, LVN to BSN, AD to BSN and RN to BSN students may have completed many of these courses or university requirements at other educational institutions. The academic advisors will assist students to determine course articulation and completion of requirements. General education requirements are aligned with the needs of the nursing program in several ways. First, two lower-division sciences courses will meet the lower division B1 (Physical Science) and B2 (Life Science) general educational requirements. CHEM 110 has received B1 certification and BIOL 217 Medical Microbiology has received B2 certification. Other selected general education courses have been identified as nursing prerequisite or preparatory courses, and as such fulfill both General Education requirements and ensure that mandatory course content is included in the nursing program. Students who wish to make economical and efficient choices will select from the approved list of general education courses in Additional Upper Division GE courses that fulfill both sets of requirements. There are 6 required units in this category. Refer to Table I and II.

### Prerequisites for the Major (28 units)

Eight prerequisites must be completed before beginning nursing course work. These eight prerequisites to the major are 1) Anatomy, 4 units; 2) Physiology, 4 units; 3) Microbiology, 4 units; 4) Integrated Chemistry, 4 units; 5) Written Communication (GE Area A2), 3 units; 6) Oral Communication (GE Area A1), 3 units; 7) Mathematics (GE Area B3), 3 units; and 8) Critical Thinking (GE Area A3), 3 units. The units for most of these courses will be counted under the units for general education units (Table I and II), but completion of others in this category will add 10 additional units to the major. Those additional units are shown in Table III.

### Preparatory Courses

Preparatory courses for the major meet the BRN requirements for certain content areas to be included in a nursing curriculum. Many of the preparatory courses are also courses which satisfy general education requirements and were identified as preparatory courses for the major because of the particular relevance of the course to augment nursing theory or practice. The following required courses are preparatory to the major and may be taken before or concurrently with nursing courses. These preparatory courses add 3 additional units to the major and are found in Table IV.

Generic (Basic) Bachelor of Science in Nursing Program

The total number of units required for the generic student is 133 semester units including 36 units lower division major, 33 units upper division major, 30 units required support and other GE requirements, and 6 units American Institutions.

Required Nursing Courses
The remaining courses in the curriculum are nursing courses. These are divided into lower division (36 units) and upper division (33 units). In the pre-licensure content there are 21.5 units of didactic and 14.5 units of clinical in lower division courses an additional 3 units of didactic and 3 units of clinical in the upper-division level (NRS 420,421). This pre-licensure content is regulated by the BRN.

</tbody>
</table>

Total Lower Division Nursing Courses: 36 Units
Total Upper Division Nursing Courses: 33 Units

The upper-division courses are designed to build on the lower-division content and provide the foundations for the nursing care of high-acuity patients in diverse clinical settings. As the practice site for health care delivery shifts progressively from the acute care arena to the community, nurses are functioning more autonomously in less structured clinical settings and are required to make clinical decisions formulated from a broadening knowledge base. The BSN educated nurse is prepared to practice in all health care settings. Nursing courses with 300-level and 400-level course numbers contain content that is considered baccalaureate level content and which is not regulated by or subject to approval by the BRN. The upper-division content is consistent with the CCNE standards and adds 33 more units to the major.

Total Upper Division Nursing Courses: 33 Units

* Although these courses carry upper division numbers, they are a part of the pre-licensure content and subject to BRN approval and review

Advanced Standing Admission to the BSN Nursing Program

Advanced standing students are students who transfer from another nursing program prior to completion of the program or LVN transfer students. It is anticipated that a student transfers to CSU Channel Islands prior to completion of a nursing program from another university or community college, the nursing course equivalents will be determined by the nursing program faculty member who has familiarity with the content area. Students will submit a request for transfer course credit substitution and supporting documents such as course syllabi, class notes, and other related materials to the academic advisor who will forward the material to the Director who in turn will consult with the appropriate faculty members. That faculty member will recommend course equivalency credit and seek approval for course substitution by submitting theses requests to the Nursing Program Curriculum Committee for approval. These forms are then returned to the academic advisor who notifies the student and the personnel in the records office of
the decision. These petitions are placed in the student’s nursing file. These students will be admitted and given access to nursing clinical laboratory courses on a space available basis to assure priority for students who are progressing as scheduled. These students will be held to curriculum requirements as the generic (basic) students.

RN (Registered Nurse) and ADN to BSN (Bachelor of Science in Nursing) Program (120-138 units) Track II (offered through Extended University)

The RN-BSN and ADN-BSN student will be held to the same 54 units of general education and the same prerequisite core courses and required additional preparation for the major courses as the generic/basic student. For the returning student RN student, it is anticipated that many of the required general education courses may have been completed at a community college. These students will be required to meet the same mandatory standards either by transferable course work, certification of general education requirements by previous academic institutions or by completion of general education requirements at CSU Channel Islands. These courses will be included in the maximum transfer credit of 70 lower-division units from a community college. Imbedded in these 70 units are 36 units which will be articulated for lower-division nursing courses from a BRN approved community college nursing program. Some prerequisite and required preparatory courses to the nursing major may also be imbedded in the 54 units of required general education courses. Completion for the second language requirement in Spanish is strongly recommended.

*Students will complete 2 units of specific RN to BSN courses. This course provides a transition to the same level of educational preparation. These courses also will introduce the Neuman Systems Model conceptual framework that is the CSU Channel Islands unifying them for the nursing curriculum, as these students may have been exposed to different unifying themes at their previous educational institutions.

**Challenge available.

Or

Any GE D or E Course if PSY 213 already completed | 3

* Not required if content was integrated in RN classes

The total number of units for the RN-BSN major is 120-138 and most RN-BSN students will need additional units to complete the requirement for the major. The number of units is dependent upon the previous courses completed at the community college. The following are other required support courses.
**Upper Division and Other GE Requirements  15-27 Units**

**Upper Division Supporting Courses  6 units**
- ANTH 443  Medical Anthropology, GE D, UDIGE  3
- BIOL 432  Principles of Epidemiology and Environmental Health, GE B2, D, UDIGE  3

**Upper Division GE Elective  3 units**
Recommend NRS/PSY 348 (GE D, E, UDIGE) is ANTH 102 is completed
Recommend NRS/PSY 342 (GE C3B, UDIGE) if SOC 100 is completed

**Other GE Courses  1-12 units**
- 3 units  Language requirement (GE C3A) if not already completed
- 3 units each in GE B4, C1 and C2 if student is not GE certified
- 1 unit of NRS 497, Directed Study if needed to meet 120 units

**American Institutions  6 units**

**LVN 30 Unit Option**

The LVN 30 unit option does not lead to a degree in nursing and students are not required to complete the lower division general education pattern, pre-requisites nursing core courses or the additional preparatory courses to the major. Admission to this track is on space availability. At the completion of this program of study, students will be eligible to take the NCLEX examination for registered nursing courses:

**Required Courses**

The required courses in the 30 unit option for the LVN student are beyond the traditional first year courses. LVN students in the 30 unit option will be exempt from the prerequisites for these nursing courses:

**System wide Placement Test Requirement**

The California State University requires each entering undergraduate, except those who qualify for an exemption, to take the CSU Entry Level Mathematics (ELM) and the CSU English Placement Test (EPT) prior to enrollment. These placement tests are not a condition for admission to the CSU, but they are a condition of enrollment. They are designed to identify entering students who may need additional support in acquiring basic English and mathematics skills necessary to succeed in CSU baccalaureate-level courses.

Undergraduate students who do not demonstrate college-level skills in mathematics will be placed in appropriate remedial programs and activities during their first term of enrollment. Students placed in such programs in mathematics must complete all remediation in their first year of enrollment. Failure to complete remediation by the end of the first year may result in denial of enrollment for future terms. Students in need of English or math remediation might be faced with an additional year in the program to get their beginning skills to the appropriate level.

**Advisement for Nursing Majors**

All newly-admitted students are required to attend a University Orientation Session. You will not be allowed to enroll until you have attended such a session. For students who declare Pre-Nursing as their intended major such student will attend a break-out nursing session as part of the orientation. As part of the University orientation Session, the Nursing Advisors will provide newly-admitted students with information on requirements for the major, any supplemental program admission criteria, if applicable, general education requirements, other requirements needed to graduate, and the advisors will assist students with registering for their first semester of courses. Newly-admitted transfer students will all receive an evaluation at the time of attending the University Orientation, with a thorough review of prior coursework and what courses will be accepted here at CSU Channel Islands toward the BSN degree. For students who change their major to Pre-Nursing after entering the University, theses students can schedule a one-on-one advisement appointment with the Nursing Advisor to learn about the major and requirements. For prospective Nursing students, the Nursing Advisors offer regularly-scheduled Nursing Information Sessions on campus each month. For students who live outside the area, information is provided by the Nursing Web Site at [http://nursing.csuci.edu](http://nursing.csuci.edu). For prospective students who are attending a California Community College; students are encouraged to seek assistance from a Counselor at that Community College.

To contact a nursing advisor please use the following emails:

- Beth Williams  Beth.williams@csuci.edu
- Cheryl Sund    Cheryl.sund@csuci.edu
- Karen Jensen   Karen.jensen@csuci.edu
Advisement regarding A-G graduation requirement is completed through the advisement center located in Bell Tower first floor at www.csuci.edu/academics/advising.

Course Registration

Registration takes place on the web at myci.csuci.edu. This is the University's student information system. Students register for classes at appointment times, which are based on class level and descending number of units earned (seniors, junior etc). New students will also register this way during orientation and new student advising workshops. Access to the system is secured by a unique user ID and password. A How to Register for Classes guide is available online at http://www.csuci.edu/students/rec_libr_docs/How%20to%20Enroll%20in%20Classes.pdf The Schedule of Classes is published online prior to the start of each registration period.

The myci.csuci.edu system also allows you to maintain your address and phone number, view your grade at the end of the term and review the transcript of classes taken at CSU Channel Islands.

Adding/Dropping Courses

Prior to the start of classes and through the end of the third week of the semester, students may drop classes on the web at mycsuci.edu without any authorization of the instructor. Beginning with the fourth week of instruction and prior to the tenth week of instruction, withdrawal is permissible only for serious and compelling reasons. Documentation of this serious and compelling reason must be presented to the Program Director. If dropping a class the approval signatures of the instructor and the Program Director are required to withdraw from a class during this period. Dropping from a course in the nursing program at a time where the grade is less than a C is considered a fail for readmission purposes even though the record will be recorded as a W the program considers it a W failing as opposed to a W passing.

Withdrawal during the final six weeks of instruction is not permitted except in cases where the circumstances causing the withdrawal are beyond the student’s control, and the assignment of an “I” (Incomplete grade) is not practical. Ordinarily, withdrawal in this category will involve complete withdrawal from the University. The approval signatures of the instructor and program director are required to withdraw from classes during this period. Documentation of the circumstances causing the student to request withdrawal will be required. Dropping from a course in the nursing program at a time where the grade is less than a C is considered a fail for readmission purposes even though the record will be recorded as a W the program considers it a W failing as opposed to a W passing.

Failure to properly withdraw classes may result in receiving a failing grade (WU grade). Be aware that summer sessions have different add/drop periods and students must check these dates posted on the university website prior to the start of the summer term.

For a student who fails a nursing course with a corequisite course an administrative withdrawal will be completed for the corresponding course.
Grading Practices

In order to standardize grading across courses faculty have adopted the following grading practices:

1. Definition of Terms
   a. Critical Behaviors
      i. Critical Behaviors are defined as those student behaviors (cognitive, attitudinal and psychomotor skills) that must be demonstrated in order to allow successful course completion.
   b. Higher-order behaviors
      i. Higher-order behaviors are those behaviors that demonstrate the presence of critical behaviors but go beyond this level of performance by reflecting more complex cognitive, attitudinal and psychomotor skills. In comparison to a behavior indicative only of knowledge input, the student manifesting higher-order behavior demonstrates the integration of various elements of content within the course or level.
      1. Knowledge – Learning the information
      2. Comprehension – Understanding the information
      3. Application – Using previously learned information in a new situation to solve problems that have single or best answers
      4. Analysis – Examining specific parts of information to develop divergent conclusions by identifying motives or causes, making inferences, and/or finding evidence to support generalizations
      5. Synthesis – Creatively or divergently applying prior knowledge and skill to produce something new or original

2. Evaluation of Nursing Theory Courses
   a. In nursing theory courses students are evaluated for comprehension of knowledge acquired, i.e. critical knowledge and higher-order cognitive skills
      i. The grading of theoretical comprehension may be accomplished by using percentage/letter grade system to arrive at a final grade and will be based on the grade earned on course examinations, individual/group presentations, case studies and other specific written assignments
      ii. Credit by examination for theory courses will, when feasible, utilize the same system(s) as those used for students taking the course.
      iii. Item analysis is done on all examinations. The results of the item analysis and examinations are available for student review upon individual or group request.

See ATI Remediation Policy in Appendices

3. Evaluation of the Nursing Laboratory Courses
   a. There are two areas in which the student is evaluated in nursing laboratory courses:
      i. Clinical application and theoretical-clinical synthesis
         1. Clinical Application:
a. Clinical application involves only the evaluation of critical behaviors. This evaluation verifies that the student has displayed all critical behaviors identified in the course. A grade of pass/fail is given.

i. Critical behaviors (those behaviors having emphasis on safety, professional growth and improvement that are specific to content in each course) are passing if the student is able to accomplish them competently. Evaluation is based upon observation of student performance, i.e., return demonstration in clinical or comparable setting. Students may feel free to contact the instructor for clinical evaluation of critical behaviors whenever they feel competent enough to carry out these new skills. Evaluation may take place in simulated clinical surroundings, when appropriate, as well as the clinical laboratory itself. Critical behaviors are evaluated by specific evaluation criteria that are made available to students at the beginning of the experience.

ii. Students are held accountable for all critical behaviors required in nursing courses prerequisite to a succeeding course. Students should be made aware of specific critical behaviors learned in previous nursing courses that are applicable to the present course. Failure to perform a critical behavior from a prior course that is necessary for a more advanced skill should be deemed unsatisfactory in that skill at that time. e.g., a student who fails to observe sterile technique (lower division level) while performing deep naso-tracheal suctioning (upper division level) is performed unsatisfactorily.

2. Theoretical-Clinical Synthesis

a. The Theoretical-clinical synthesis involves synthesizing and utilizing theory in both the assessment of patients and families and in planning and implementing of nursing care. Various methodologies can be used for evaluation of this ability, e.g., assessment tools, teaching plans, independent projects, nursing care plans, case studies, tape recordings, tutorials, videotapes, case narratives, recording on agency records, role playing and examinations. Letter grades are assigned to this evaluation component.

Grading Scales

The evaluation process for all courses will be specified in a course syllabi and involve active participation of students. In order to standardize grading across courses, nursing faculty will adhere to the following grading practices:
Evaluation of Nursing Theory (Didactic) Courses

Evaluation methods for the didactic courses will include examinations, written course assignments and individual/group presentations. Theory (didactic) courses will receive a letter grade. The faculty may chose a traditional or plus minus grade system. Irrespective of the grading system chosen, the faculty will adhere to the guidelines for grading found in the California State University Channel Islands General Catalog.

Approved Grading Scale 1.20.11
Letter Grades for the course are assigned as follows:

<table>
<thead>
<tr>
<th>Quality Points</th>
<th>Letter Grade</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.0</td>
<td>A</td>
<td>95-100%</td>
</tr>
<tr>
<td>3.7</td>
<td>A-</td>
<td>90-94.9%</td>
</tr>
<tr>
<td>3.0</td>
<td>B</td>
<td>85-89.9%</td>
</tr>
<tr>
<td>2.7</td>
<td>B-</td>
<td>80-84.9%</td>
</tr>
<tr>
<td>2.0</td>
<td>C</td>
<td>76-79.9%</td>
</tr>
<tr>
<td>1.0</td>
<td>D</td>
<td>65-75.9%</td>
</tr>
<tr>
<td>0</td>
<td>F</td>
<td>64.9 and below</td>
</tr>
</tbody>
</table>

On a +/- grading scale C- is not considered passing. Therefore, the bottom of the scale is set at C 76 with no C- grades.

Students will have the opportunity to review examinations and written course assignments and to meet with the faculty assigned to the course during regularly scheduled office hours to discuss their progress and course grade. These office hours will also be used for personal interaction and to determine learning needs.

Evaluation of Nursing Clinical Courses

Clinical laboratory courses will also receive a letter grade however; there are two areas in which the student is evaluated in nursing laboratory courses. Those areas are theoretical-clinical synthesis and clinical application.

Theoretical-Clinical Synthesis

The theoretical-clinical synthesis involves synthesizing and utilizing theory in both the assessment of patients and families and in the planning and implementing of nursing care. These letter grades will be based on required course work for the clinical laboratory courses that can be realistically assigned a letter grade such as daily patient care preparation plans, patient care studies, class presentations, assessment tools, teaching plans, and other written assignments. Additionally, various other clinical assignments such examples of patient/client interactions on tape recordings, tutorials, videotapes, and case studies, student recording on agency records, role playing and clinical examinations. Clinical examinations will not be given during the clinical laboratory hours.

Clinical Application

Clinical application involves only the evaluation of critical behaviors and clinical skills. A grade of pass/fail is given. Critical behaviors (those behaviors having emphasis on safety, professional growth and improvement that are specific to content in each course) are passing if the student is
able to accomplish them safely and competently. Performance of clinical skills will be judged as pass (safe and competent), marginal (safe but less than completely competent), or fail (unsafe and less than competent). Evaluation is based upon observation of student performance, i.e., return demonstration in a clinical or comparable setting. Students may feel free to contact the instructor for clinical evaluation of critical behaviors whenever they feel competent enough to carry out these new skills. Evaluation may take place in simulated clinical surroundings, when appropriate as well as the clinical laboratory itself.

Faculty will determine the percentage of failing or marginal clinical performances that will compromise a failing grade for the course. There must be a passing grade on clinical performance as well as a minimum letter grade of C to pass the clinical course. For many of the clinical nursing courses, particularly the lower division courses, students will receive verbal and/or written feedback daily, regarding their progress. It will be common practice for faculty to hold midterm and final conferences to discuss student progress toward meeting course objectives.

If a student is experiencing difficulty with either didactic or clinical application content, the faculty may assist them directly and/or refer them to the Simulation Lab Coordinator with a remediation plan. The Simulation Lab Coordinator will work with the student and the faculty to determine the problem. The student might be referred for appropriate tutorial or other student services or directed to additional reading or computer assisted instructional (CAI) media. If the problem is with performance of nursing skills and procedures, the student will be directed to obtain additional practice in the Nursing Simulation Laboratory under the supervision of the Simulation Lab Coordinator.

Minimum Passing Grades in Courses

Students must earn a minimum of a “C” (2.0) grade in all required nursing, natural science and social science courses. Students may be able to repeat a prerequisite course, but both course grades will be figured into the calculation for supplemental criteria. Students may not enroll in 300-level required nursing courses until they have completed all lower division nursing courses with a “C” grade or better. Students may not enroll in 400-level required nursing course until they have completed all lower division nursing and 300-level nursing classes with a “C” grade or better.

Criteria for Program Continuance and Repeating a Nursing Course

The criteria for program continuance are as follows:
1. Students in the nursing major must attain grades of C or better in all required nursing courses.
2. Students in the nursing major must maintain good academic standing. Students on academic probation are not permitted to enroll in a nursing course until the probation has been removed.
3. Nursing courses for which the student earns less than a grade of C may be repeated once on a space available basis. In order to repeat a nursing course the student will be required to:
   a. Consult with the course faculty to determine what academic/personal factors led to a less than satisfactory grade.
b. After meeting with the course faculty, the student must schedule a meeting with the nursing advisor.

4. If a student is failing in a clinical course at any time in the semester with a grade less than “C” or with demonstrated unsafe patient care behaviors as outlined in the Clinical Evaluation Tool, the student can be failed and removed from the clinical setting at any time in the semester.

5. According to BRN regulations students must be enrolled in didactic and clinical courses simultaneously.
   a. If a student has passed a clinical course but failed the didactic or if the student has passed didactic and failed clinical, the student will receive an Academic Withdrawal from the co-requisite course (either clinical or didactic).
   b. Students may repeat both co-requisite courses in which they have earned less than a C or been academically withdrawn on a space available basis.
   c. Failure of one or both co-requisite clinical/didactic courses will be considered failure of one course.

6. Students with failure in two required nursing courses will be withdrawn from the Nursing Program.
   a. Failure in two required nursing courses is defined as a grade of less than C in two separate nursing courses or in two attempts in one nursing course.
   b. Students who fail two nursing courses must meet with nursing advisor to discuss program withdrawal and student options.
   c. Students who are withdrawn from the nursing program may complete the semester in free-standing nursing courses in which they are currently enrolled.

Clinical Absence Policy

Attendance in clinical laboratory is mandatory and will be kept as the minimum clinical objectives must be met to successfully complete the course. As general policy, the student can only be absent for 10% of the clinical hours without jeopardizing their ability to meet the clinical objectives of the course. Absences from clinical practicum hours must be for serious and compelling reasons such as:

- Illness of self or immediate family
- Death of an immediate family member
- Court Subpoena
- Recognized religious observation
- Educational absence: an absence in which written permission from the faculty responsible for the class or clinical is given
- Military Deployment: day of deployment and return from deployment of an immediate family member
- Faculty approved attendance at nursing research convention or other educational opportunities.

In order to be excused, all absences except illness must be accompanied by documentation.
Emergencies as listed above which prevent the student from attending assigned clinical practicum and meeting the educational objectives must be made up following these guidelines:

- Students are required to submit appropriate documentation of absence to clinical instructor within 7 days of missed clinical.
- Students may make up one clinical practicum using Virtual Clinical Excursions or other simulated experience under the direction of the simulation lab instructor except during NRS 201 when actual content must be covered.
- Virtual Clinical Excursions must be completed within one week of date of clinical absence. Clinical practicum missed Week 15 must be made up prior to the last day of the semester.
- Verification of the completion of the Virtual Clinical Excursion will be completed by Simulation Lab Coordinator. The student is responsible to taking the verification to the instructor within a week of completing the experience.
- A second missed clinical practicum will be evaluated by the Student and External Affairs Committee for make-up eligibility. Since this absence would constitute over 15% of the laboratory experiences the student would have to have met a large portion of the objectives of the course. Decisions regarding eligibility for a second makeup would be determined by the previous grade in the clinical rotation and the ability to successfully meet the clinical objectives of the course.

Probation and Readmission

If the student’s academic performance results in an overall GPA of below 2.0, the student is placed on academic probation. University policy governing probation disqualification and readmission can be found in the California State University Channel Islands, General Catalog. The student who is on academic probation may not proceed in required nursing courses until the GPA deficiency is removed. The student is referred to the academic advisor who will provide the student information related to the nursing program policy and assist the student through the process for reinstatement. The policy requires that the student submit a petition that explains the relevant surrounding circumstances leading to disqualification. An explanation and academic plan to alleviate or mitigate the factors related to disqualification and a plan to improve academic performance should be included in the petition. The academic advisor offers assistance in the development of the petition and the plan and refers the student to relevant university resources. The petition is then submitted to a college level reinstatement committee who acts on the merit of the petition.

Academic Honesty

Each student shall maintain academic honesty in the conduct of his or her studies and other learning activities at CSU Channel Islands. The integrity of this academic institution, and the quality of the education provided in its degree programs, are based on the principle of academic honesty. Academic dishonesty is an especially serious offense. It diminishes the quality of scholarship and erodes those who depend upon the integrity of the campus program. Such dishonesty includes:

- Cheating – using attempts to use unauthorized materials, information, or study aids in any academic exercise.
- Fabrication – falsifying or invention of any information or citation in an academic exercise.
• Facilitating academic dishonesty – intentionally or knowingly helping or attempting to help another to commit an act of academic dishonesty.
• Plagiarism – intentionally or knowingly representing the words, ideas, or work of another as one’s own in any academic exercise.

A full discussion of academic dishonesty is found in the University Catalog.
Specific Requirements for Nursing Courses

Use of APA Guidelines

Formal papers in nursing classes should be written, unless otherwise instructed, following the guidelines in the most current edition of the Publication Manual of the American Psychological Association. The book should be purchased and kept for reference. Guidelines are also available at the website: http://owl.english.purdue.edu/owl/resource/560/01/. Another recommended template for APA style papers is available through Reference Point Software at http://referencepointsoftware.com/

Admission to Clinical Labs

Prior to the admission to the clinical nursing laboratory experience the following items must be on file in the Nursing Program office. Students should always keep an additional copy which will be presented to the clinical instructor.

- Proof of student health insurance
- Annual negative TB skin test and if converted, follow CDC guidelines for x-ray
- Seasonal flu/H1N1 vaccine submitted annually by October 15.
- Evidence of current immunization immunity to tetanus/diphtheria or titer; mumps or titer; measles or titer; rubella or titer; rubeola or titer; varicella zoster or titer; and Hepatitis B or titer. Immunizations, vaccinations are available at the Student Health Center or they may be completed through the student’s personal health provider.
- Current and appropriate CPR certification for the healthcare provider BLS with AED.
- All students must complete HIPPA training. This must be done prior to admission to the clinical setting. Information concerning access to the HIPPA module and other agency specific requirements will be provided in the first clinical course.
- Additional content on infection control, universal precautions, abuse reporting, and waste disposal may be required.
- L.A. City Fire Card - Current
- Negative Criminal Background check and Drug Screen

Physical Requirements for the Clinical Experience

The following list of physical requirements is to assist the health care provider in evaluating your ability to meet the physical requirements of CSU Channel Islands Nursing Program. If at any time throughout the nursing program you are unable to meet any of these requirements it is the student’s responsibility to be seen by their Healthcare Provider for re-evaluation. All changes in health status and ability to continue to meet the physical requirements program must be documented by the provider and submitted to the Nursing Program Director.

1. Standing/Walking – The student must be able to stand and walk on carpet, tile, linoleum, asphalt and cement while providing and managing client care, gathering client supplies and medications, obtaining and returning equipment. Approximate distance = 3-5 miles.
2. Sitting – The student must be able to sit while communicating with or teaching clients.
3. Lifting – The student must be able to lift floor to knee, knee to waist, and waist to shoulder level while handling supplies using trays (5-10 pounds) and assisting with positioning patients in bed/moving patients on and off gurneys and exam tables (average weight 200 lbs) and ability to transfer patients with a maximum of 80-100 pounds by self.

4. Carrying – The student must demonstrate the ability to carry items at waist level.

5. Pushing/Pulling – The student must be able to push/pull, using carts, utilizing crash carts, opening and closing doors, pushing/pulling beds, gurneys and wheelchairs and moving equipment and furniture.

6. Climbing/Balancing – The student must demonstrate the ability to climb stairs going to and from other departments, offices and homes.

7. Stooping/Kneeling – The student must demonstrate the ability to stoop and kneel while retrieving supplies from medication carts, bedside stands, bathrooms, storerooms etc.

8. Bending - the student must demonstrate the ability to bend at the waist while performing patient assessments and treatments, gathering supplies, assisting patients with positioning, adjusting patient beds and exam tables, bathing patients and emptying drainage apparatus.

9. Crouching/Crawling – The student must demonstrate the ability to crouch and crawl under beds, behind beds and bedside to retrieve dropped items.

10. Reaching/Stretching – The student must demonstrate the ability to reach/stretch administering and monitoring IV therapy, gathering supplies, operating computers, disposing of equipment and linens, assisting with patient positioning, connecting equipment and linens, connecting equipment, cleaning equipment and retrieval of patient files.

11. Manipulating – The student must demonstrate the ability to have hand-wrist movement, hand-eye coordination, simple firm grasping required and fine and gross motor dexterity required to calibrate and use equipment and perform CPR.

12. Feeling – The student must demonstrate tactile feeling required to complete physical assessment including palpating and notation of skin temperature.

13. Twisting – The student must demonstrate the ability to twist at the waist while gathering supplies and equipment, administering care and operating equipment.

14. Communicating in verbal and written form – The student must have 95% ability to communicate nursing actions, interpret patient responses, initiate health teaching, document and understand health care activities, and interact with patients, staff, faculty and peers.

15. Hearing – The student must have the ability to hear and interpret many people and correctly interpret what is heard, auscultation, physician orders – whether verbal or by phone, patient reports and cries for help, fire and equipment alarms etc.

16. Seeing – The student must have acute visual skills necessary to detect signs and symptoms, coloring and body language of patients, color of wounds and drainage, and possible infections anywhere. Interpret written words accurately, read characters and identify colors in the patient's records and on the computer screen.

Other Clinical Course Requirements

Name Pins:
Official name pins are to be obtained from Dove Uniforms. In addition you will need an official CSU Channel Islands Picture ID attached to your nametag. Hospital name badges will be distributed prior to each clinical rotation per protocol of the individual hospital.
Nurse Pack:
A nurse pack must be purchased from the bookstore prior to the beginning of the first nursing clinical course. The nurse pack contains skills lab equipment and supplies. See Appendices for sample list of items included. It does not include a stethoscope. The stethoscope will need to be individually purchased.

Handheld Mobile Device/Software Requirements:
A handheld mobile device is required so that you have a reference source for medication administration, interpretation of diagnostic tests, a medical dictionary, and rationale for signs and symptoms. In addition to the handheld device you will be required to purchase software as recommended in Fundamentals of Nursing. The software will be available at the university bookstore. The combined price of the handheld device and the software is less expensive than requiring textbooks for the same content used by other programs.

42
Nursing Simulation Laboratory
The nursing simulation laboratory is located in University Hall, room 1650 and contains a 6 bed open lab with a 1 bed ICU/testing station. Lab is open Monday-Friday, 8:30-5:00 with open hours for student practice. Students must wear uniforms while practicing in simulation lab.

Guidelines for Professional Image

Student Dress Code
Uniforms/clinical wear: students should dress in the approved Nursing Program uniform manufactured by Dove. These uniforms should be clear and appropriately wrinkle-free at all times. It is recommended that you purchase two uniforms so that they may be properly cleaned between clinical. They should fit well (not too tight or short) and reflect a professional appearance. School Patch is sewn on the upper right front of the uniform. Casual professional attire may be worn to the clinical area when doing patient workups but an approved white lab coat should be worn over the clothing. Name badges should be visible on lab coats and uniforms. Sports and play clothes are not acceptable this includes jeans, visible midriffs, Bermuda shorts, sleeveless dresses or tops, sweat shirts, leg warmers and T-shirts. No low necklines or cleavage. No sagging pants will be permitted. Appropriate undergarments of white or natural color must be worn.

Identification: A student name tag, purchased from Dove Uniform with a CSU Channel Islands Picture ID attached should be worn at all times with uniform and lab coat.

SAMPLE

Jane Doe, RN, SN
CSU Channel Islands

Footwear: Shoes should be white, clean, closed-toe, with non-skid soles of non-porous material. Shoelaces must be white. Clogs are not acceptable. Heels are to be no greater than 1 inch in height.

Hair: Hair must be clean and neatly combed. Any extreme look or color is not permitted. Hair at should length or below should be combed away from the face so that it will not fall forward over the face while performing normal nursing duties. Long hair must be tied back. Plain barrettes or combs are allowed. Neatly trimmed mustaches and beards are acceptable when the style is not extreme. Males should be clean shaven.

Make-up: Make-up should appear fresh and natural. Excessive make-up is not acceptable.

Nails: Nails should be kept clean and smooth. If polish is used, it should be colorless natural finish. Nail polish should be un-chipped and without adornment. Fingernail length should not exceed beyond the tip of the finger. Acrylic or other types of artificial nails are not permitted.
**Perfume:** Because of the close contact with staff, patients, and visitors, the use of perfume and after-shave lotion is not appropriate.

**Sunglasses:** Sunglasses are a block to interpersonal communication and should not be worn. Transition lenses or those with a transparent tint are acceptable.

**Jewelry:** Only one small ring, class ring, or wedding band/set is acceptable. A small ring is defined as the same size or smaller than a class ring. Necklaces and neck chains may be worn inside uniforms. Very large or long dangling earrings are not appropriate. One stud or small earring per ear is acceptable. Watches and nursing school identification pins may be worn.

**Hygiene:** Personal hygiene plays a major role in professional appearance. All students should pay particular attention to bathing regularly, ensuring absence of body and mouth odor and a neat and clean appearance. Gum chewing is not allowed.

**Body Piercing/Body Art:** Students may have no more than one visible piercing in each ear and those must conform to the clinical agency’s dress code. No jewelry/hardware may be evident other than one small, stud per ear. Body art and tattoos must be covered at all times.

**Medical Exception:** Any request for exception(s) to the appearance code for medical reasons must be signed by your personal physician or appropriate specialist. It is then given to the Director of the Nursing Program and must be updated annually.

**Equipment:** The following equipment is necessary for a clinical rotation: Watch with a second hand, writing pen, stethoscope, bandage scissors, pen light. Highly recommended is a clipboard and hemostat.

**Other Policies**

**Electronics:** Cell phones may be used with applications for investigating diseases, disorders, medications, procedures and lab tests. They may not be used for phone calls or texting during clinical hours.

**Use of Listening or Recording Devices:** State Law in California prohibits the use by anyone in a classroom of any electronic listening or recording device without prior consent of the teacher and school administrator. Any student who has need to use electronic aids must secure the consent of the instructor.

**Classroom Visitors:** Children and other uninvited guests are not permitted in the classrooms at any time.

**Email Addresses:** Students must use their university email for all email university communications. It is your responsibility to check regularly for email messages from the nursing program.

**Policy for Substance Abuse:** CSU Channel Islands is a drug-free and alcohol free campus (see CSUCI Catalog for University Policy). This extends to the clinical facilities used for clinical placements. Faculty may remove from the clinical area any student who appears to be functioning...
inappropriately because of suspected substance abuse. Dependent upon the degree and type of behavior, the faculty may refer the student to the University Student Health Center or the emergency department at the clinical setting. The faculty member may then notify the Dean of Student Life.

Students who are found to be functioning in a clinical agency under the influence of drugs, alcohol, or other chemicals may be expelled, suspended, placed on probation or given a lesser sanction for violating University policies or campus regulations. Furthermore, the abuse of drugs, alcoholic beverages or other chemicals can prevent one from receiving licensure as a registered nurse, or result in loss of licensure, in addition to criminal and civil censure.

Students may review the Board of Registered Nurse’s policy on impaired students. This policy can be accessed on their website http://www.rn.ca.gov.

Pregnancy Policy
In order to protect the life of the mother and fetus a student who is pregnant must notify the clinical and lead didactic faculty of her pregnancy. The student must submit a medical release from her physician indicating the advisability of continuing in the program and stating that she may participate in all clinical activities without restrictions. If the student elects to continue in the nursing program, she will accept full responsibility to any risks to herself and the fetus. The student must sign a waiver (See Appendix for the form) indicating acknowledgement of responsibility for the potential risks to herself and the fetus while working in the clinical facility and releasing the university and the health care facility from any responsibility during this time. The student must understand that some clinical settings may not allow pregnant students, depending on their length of gestation, and the safety of the patient care environment. If the student cannot complete the clinical objects she must withdraw from the program. The student would be eligible for admission as Advanced Placement into the program.

Policy for Prescribed Medication Use by Students in the Clinical Setting

Rationale
Safety in the clinical setting for both students and patients is the highest priority for CSU Channel Islands Nursing department.

Therefore the department requires students to notify the clinical instructor and accept an excused absence from clinical if they have been prescribed and are taking any medications that may interfere with normal functioning. Medication in this policy may include, but is not limited to:

Muscle relaxants
Narcotics
Benzodiazepines

Faculty observing any signs of impairment should discuss such behavior and notify the nursing program director.
Attendance/Patient Abandonment

Students are expected to attend ALL classes and clinicals on time as scheduled. The student will:

- Obtain faculty permission prior to leaving the clinical lab or classroom
- Attend clinical only as scheduled unless faculty approves in writing
- Students are not to go off clinical site while attending clinical coursework

Patient Abandonment – When the student accepts a patient assignment and establishes the nurse-patient relationship, leaving that assignment, without permission and no arrangement for the continuation of nursing care is considered “patient abandonment”. Patient abandonment jeopardizes the patient’s safety and is grounds for dismissal. See BRN policy on Abandonment on the BRN website http://www.rn.ca.gov/

Clinical Sites:
To provide the best clinical education hospital and community based clinical sites will include:
- St. John’s Regional Medical Center
- St. John’s Pleasant Valley Hospital
- Los Robles Hospital
- Community Memorial Hospital
- Ventura County Medical Center
- Children’s Hospital of Los Angeles
- West Hills Medical Center

Transportation:
Students are responsible for their own transportation to and from classes and clinical sites. During the Community and Home Health clinical experiences students are responsible for their own transportation to the several home visits that made throughout the clinical day.

Procedure for clinical lab signups
Courses for signup:
- NRS 201
- NRS 231
- NRS 233
- NRS 241
- NRS 453
- NRS 461

This procedure is developed to insure the equal rights of all students to the clinical placement spot of their choice. This procedure, however, in extreme circumstances, may be adjusted by the Nursing Program admissions and retention committee. Students will be notified ASAP of any changes to this procedure.

1) In approximately the 11th or 12th week of each course, the lab schedule availabilities for the following semester will be posted. At this time, each class is to conduct signups. Documented Equal Opportunity Program (EOP) students will be given priority registration and need to present documentation of EOP qualification and inform the Nursing Program Director by the 10th week of selection for clinical. All attempts should be made by students to avoid the need for a lottery, but if there are more students signed up for a lab than slots in the lab the selection goes to a lottery.

2) The lottery proceeds as follows:
   a. If the lab has more students sign-up than spaces all names of students signed up for that lab will be placed in lottery for drawing by a CSU Channel
Islands Student Nursing Association officer (or designee) with the support of the Assistant Director of the Nursing Program

b. Names are then drawn and spaces are filled in the desired lab
c. When spaces are filled, then the remaining names are placed in the available lab slots as their names are drawn. For example if there are eleven slots and there are thirteen signed up the first eleven get spots in the desired lab and the next two are placed in an open clinical slot.

3) Once the lab assignments are made, the lab sign-up sheets are posted in the Nursing Department. Students are allowed one week for collaborative switching. Both individuals need to submit a signed requested to the Assistant Director of the Nursing Program to switch lab the request must include signatures of both individuals for the mutual consent to switch.

4) Once this one week period has passed the FINAL assignments will be posted in the Nursing Department.

5) Prior to class beginning registration forms and tuition are due. It is the students’ responsibility to register for the clinical laboratory for with they are assigned in the FINAL assignments.

6) It is essential that enrollment and scheduling is done in this manner. At no time should anyone attempt to schedule him or her self in a lab other than those assigned. It causes students who are assigned to a lab the inability to register for their assigned lab.

7) All lab assignments are FINAL! Even if a lab space becomes available because someone drops etc., that space is unavailable for anyone already assigned to another lab. The reason for this are related to administrative procedures prior to the start of a new clinical rotation. The bottom line is, you must stay where you were placed at the time of sign-ups. If for some reason, you think you are in an extraordinary circumstance, and you need to speak to someone about changing, see the Assistant Director of the Nursing Program. Do not under any circumstances change your schedule through administrative or other means. The Director will provide you with options, or refer you to the first sentence of item #5 of the registration procedures above.

(Procedure adapted from Moorpark College Procedure for signup for Clinical Labs)
The university provides a wide array of services and activities for faculty and students to increase involvement in campus life. The Division of Student Affairs supports and enhances learning and the University community through quality activities, facilities, programs and services. They include: Educational Opportunity Program (EOP); Student Health Center, Student Health Insurance, Financial Aid and Scholarship and University Math and Writing Center.

Educational Opportunity Program (EOP)

Educational Opportunity Program (EOP) is designed to improve access and retention of low income and educationally disadvantaged students by providing active and targeted support aimed at increasing academic accomplishment and individual empowerment. The ultimate goal is to provide incoming students from disadvantaged backgrounds with the tools that will help them succeed in college and ultimately graduate from California State University Channel Islands. EOP provides educational access and academic, personal, social and economic support services for students whose educational and economic circumstances have been limited.

Nursing students who are enrolled in the Educational Opportunity Program must submit proof on enrollment in the program by the tenth week of the previous semester in order to facilitate priority placement of students into clinical rotations. Additional information on EOP can be found in the catalog at [http://www.csuci.edu/studentlife/eop.htm](http://www.csuci.edu/studentlife/eop.htm)

Student Health Center

The purpose of the Student Health Services is to promote good physical and emotional health. Emphasis is placed on prevention of illness through education. All regularly enrolled students are offered basic health services paid through student fees. There is no charge to see a physician or other medical provider. Additional fees may be charged for some immunizations, outside lab services, and x-rays, if needed. Services available to the Counseling and Student Health Center and at some community clinics include the following:

- Diagnosis and Treatment of Acute Illness and Injuries
- Physical Examinations
- Family Planning, including the state-sponsored Family PACT program
- Pap Smears
- Immunizations
- TB testing
- HIV Testing
- STD Screening and Treatment
- Pregnancy Testing
- Smoking Cessation
- Mental Health
- Health Education Program
- Student Health Advisory Board
- Mental Health Counseling (short term counseling)
Community Medical Clinics

When the Counseling and Student Health Center is closed or a student is unable to get to campus, basic health care services are available at no cost at any of the following seven Ventura County Medical Clinics listed below. Students must present their student identification card to the seen. (Preferred sites are notes with an *).

Magnolia Family Medical Center *
2240 E. Gonzales Road
Oxnard (805)981-5151
Urgent Care (805)981-5181

Las Islas Family Medical Group *
325 West Channel Islands Blvd.
Oxnard (805)240-7000
Urgent Care: (805) 483-0198

West Ventura Medical Clinic *
133 West Santa Clara Street
Ventura (805) 641-5600
Urgent Care: (805) 641-5620

Moorpark Family Care Center *
35 West Los Angeles Ave.
Moorpark (805)529-4624

Conejo Valley Family Care Center
223 E. Thousand Oaks Blvd. #102
Thousand Oaks (805)370-0600

Santa Paula Medical Clinic
1334 East Main Street
Santa Paula (805)933-1122

Sierra Vista Family Care Center
1227 E. Los Angeles Ave.
Simi Valley (805) 582-4000

Fillmore Medical Clinic
828 Ventura St.
Fillmore, CA (805) 524-2000
Urgent Care (805) 524-8604
Student Health Insurance

Nursing students must have health insurance that covers services beyond the scope of Student Health Services. Information regarding supplement student health insurance may be obtained from the Counseling and Student Health Center, the office of Student Life, or the website www.csuhealthlink.com.

Financial Aid and Scholarships Office

The Financial Aid office assists student in obtaining financial aid resources to meet their educational costs. Students interested in financial aid must complete a Free Application for Federal Student Aid (FAFSA), which can be obtained in the Enrollment Center, although the recommended method of application is through the online application at www.fafsa.edu.gov. A variety of financial aid resources are available to students including grants, loans, federal work study and scholarships. After students have completed and submitted the FAFSA they may be considered for the following: Grants, Loans, Federal work study, scholarships.

Scholarships

The University in participation with the community has an endowment that provides scholarships, which are based on academic excellence, financial need and community service. This annual scholarship opportunity takes place each spring and applications are open to both new and continuing students. Students may complete a scholarship application, which is found on the Financial Aid website. Endowed Scholarships can be found in the CSU Channel Islands Catalog, some of the scholarships are particularly suited for nursing students.

University Math and Writing Center

At the Math tutoring lab and the University Writing Center, the process is collaborative. Tutors work with students to encourage effect, independent learning and to further knowledge and understanding during their education at CSU Channel Islands. The new location is in second floor, Broome Library.
Policies and Procedures for Student Complaints/Grievances

Student Due Process

If a problem or complaint arises, students have the right to have the matter investigated as noted in the Student Judicial Process as described in the CSUCI Catalog. Most problems involve misunderstanding, human error or lack of information about established rules. To address such problems, it is often best to speak directly to the faculty or staff involved. If the matter is not clarified or resolved, it may be useful to talk next with the Director of the Nursing Program. If not resolved at that level the Director of the Program can direct students to the Student Judicial Process as stated in the CSUCI catalog. The next step involves a complaint to the Judicial Affairs (Officer of the Dean of Student Life), the Judicial Officer investigates the complaint or allegation. If there is evidence to substantiate the charge, the Judicial Officer will initiate the student disciplinary process. (See complete policy below).

Accountability
The Vice President for Student Affairs and Judicial Affairs in the Office of Student Development

Applicability
All registered students at CSUCI

Definition(s)
Adjudicated –To hear, determine, and settle a case by judicial procedure.
Preponderance –Evidence presented which establishes a majority (51%) in favor of one side or the other.
Adverse-witness –A witness for the University testifying against the accused student.

Informal Disposition –Resolution without formal trial-type hearing usually by mutual agreement between the student and the Judicial Officer, including the sanctions to be imposed, if any.

Where possible, informal procedures are implemented, emphasizing the personal growth and development of the student. Where formal procedures are utilized, the system is designed to provide a prompt, fair, impartial hearing and resolution of the matter. When a complaint is received by Judicial Affairs (the Office of Student Development), the Judicial Officer investigates the complaint or allegation. If there is evidence to substantiate the charge, the Judicial Officer will initiate the student disciplinary process. Judicial Affairs notifies the student(s) in writing of the alleged misconduct and directs the student(s) to schedule a meeting with the Judicial Officer.

At the initial meeting, the student is advised of his/her rights and informed of the evidence supporting the charges. The student is provided with an opportunity to respond and to openly and honestly discuss the incident and possible resolutions of the case. Students involved in criminal violations are subject to remedies through the criminal justice system (e.g. University Police Department and the Ventura County District Attorney’s office) as well as Student Disciplinary action. In the event that a resolution cannot be reached through the informal process the Judicial Officer shall proceed to a formal process.
The following rights shall be explained to the accused prior to the commencement of any formal judicial hearing:

- All parties shall be afforded reasonable written notice, at least five (5) working days prior to the hearing. A letter sent to the address listed in the registrar’s records shall constitute full and adequate notice. Written notice shall include:
  1. A statement of the time, place and nature of the proceeding.
  2. A statement of the nature of the case and of the jurisdiction under which it is to be adjudicated.
  3. A brief statement of matters asserted. Thereafter, upon request by the accused, a more detailed and definitive statement will be furnished prior to the commencement of any formal hearing.

- An accused student may choose to have an advisor present at the hearings.
- All hearings will be conducted on the basis that the accused is not in violation until the preponderance of evidence proves otherwise.
- All hearings shall be private and closed only to persons directly involved in the matters being adjudicated. The accused may request that a hearing be open to others. The University shall consider such a request in light of the best interests of all persons involved and of the university.
- The accused may inspect any evidence presented in support of the charges. Evidence may be presented in defense of the accused.
- The accused may hear and question adverse witnesses.
- The accused shall not be forced to present self-incriminating evidence; however, the University is not required to postpone disciplinary proceedings pending the outcome of any criminal prosecution.
- The determination of ‘in violation’ or ‘not in violation’ as charged, shall be based solely on the evidence presented at the hearing.
- The determination from a formal hearing and any sanctions assigned and the Student’s Appeal Rights shall be furnished in writing to the accused within five (5) working days following the hearing.
- The enrollment status of the accused shall remain unchanged pending the University’s final decision in the matter except in cases where the President or President’s designee determines that the safety, health, or general welfare of a student or the university is involved.

The Judicial Officer and/or the Hearing Officer may recommend any disciplinary action listed below with any appropriate modifications as well as any of the penalties listed under informal disposition.

**Verbal Disciplinary Warning**

A verbal disciplinary warning is an official warning that the student’s behavior is in violation of the CSUCI Student Code of Conduct. The verbal warning is the least severe of all the sanctions. If the student is found to be in violation of a second charge, subsequent action may be more severe.

**Written Disciplinary Warning**

A written disciplinary warning is an official reprimand for violations of specified University policies or campus regulations. The written warning is placed in the students file for a specified period of time. The warning is then removed if the student does not commit any further violations.
during the specified time. If the student is found to be in violation of a second charge, subsequent action may be more severe.

**Disciplinary Probation**
Disciplinary probation status is designed for a specific length of time extending from a month to a number of semesters. Restrictive conditions may be imposed and vary according to the severity of the offense. Restrictive conditions include, but are not limited to, the following: loss of good standing, which may become a matter of record; the loss of eligibility to receive any university award, scholarship, loan, honorary recognition, or initiation into any local or national organizations; denial of the privilege to occupy a position of leadership or responsibility in a university student organization, publication, or activity, and loss of privilege to represent the university in a public capacity.

While under disciplinary probation, the student is given a chance to show the capability and willingness to live in accordance with the university rules. However, if the student is found to be in violation through another action while on disciplinary probation, more serious consideration will be given to suspension or expulsion from the university.

**Suspension***
A student involved in an offense warranting consideration of action more serious than disciplinary probation, or one involved in repeated misconduct may face suspension. Suspension is the separation of the student from the university for a specified period of time, after which the student is eligible to return, provided that the student has complied with any conditions imposed as part of the suspension. The length of the suspension period shall be definite and may extend from days to a number of semesters. During suspension, a student may not attend class.

**Expulsion***
Expulsion is the permanent separation of the student from student status from the university. When an offense is of such severity that the university will not allow the student to re-enroll, the student will be expelled. When a student has been expelled from the university for disciplinary reasons, a full report will be placed in the permanent record of the individual concerned.

* These sanctions may be deferred, i.e., the student may be permitted to remain in school on condition that he/she waives the right to a formal hearing for a subsequent violation. Sanctions may be imposed separately or in combination with other disciplinary action.

**Restitution**
Reimbursement, either monetary or by service(s) performed to, or misappropriation of University property, or property belonging to campus community members.

**Special Assignment**
Assignment of costs, labor, duties or other responsibilities, (e.g., apology, research paper, community services etc.), which are appropriate to the violations. Special assignments may be imposed at any level of sanctions.
Course Grade Appeals

As identified in the CSUCI Catalog the policy on grade appeals includes:

1. Each student has the right to appeal the final course grade, but only the final grade. For example, a student may not appeal grades on individual assignments and/or examinations.

2. Appeals are limited to situations in which the student believes the grade was “prejudicially”, “capriciously” or “arbitrarily” assigned.

3. The appeal must be initiated within the first seven weeks of the first regular semester after assignment of the grade. A student who believes that the course grade has been assigned inappropriately must follow the proper steps in the appeal process, observing the time limits for completion of the steps as follows:
   a. Step 1: The grade appeal must first be directed to the instructor of the course, in writing by the end of the sevenths week of the semester and copied to the Director of Nursing Program or department Chair. If the grade is not correct, the instructor can change the grade with a change of grade form. The instructor has two weeks to respond to the students request in writing and copied to the Director of the Nursing Program or department Chair. Students who file a grade appeal after the fifth week may not have their appeals settled by the end of the semester.
   b. Step 2: If the grade is correct and the student is not satisfied with the instructor’s explanation, and intends to appeal the grade, the student must make an appointment to speak with the Nursing Program Director. If the instructor is not available or does not respond to the student’s appeal within the given time frame, the Nursing Program Director or Program Chair may act on behalf of the instructor. If the Nursing Program Director or Program Chair is the instructor, the student should speak with the Associate Vice President of Arts and Sciences (or designee). The program chair or Associate Vice President of Arts and Sciences (or designee) cannot change the grade, but will then discuss the issue with the instructor and provide a response by the end of the ninth week of the semester to the student.
   c. Step 3: If the Student is not satisfied after receiving the response from the appropriate administrator, the student should submit a written appeal by the end of the eleventh week of the semester to the University Appeals Committee through the office of Academic Affairs.
   d. Step 4: The University Appeals Committee will forward the student’s statement to the instructor in writing. The instructor will be required to respond in writing by a specified date within the semester. The student's statement and the instructor's response will be reviewed by the entire committee, after which the committee can:
      1. Request more information from the student and/or the instructor
      2. Decide to change or maintain the grade
   e. Step 5: When the committee has made its decision it will notify the student and instructor in writing and the student will be given a copy of the instructor’s written response by the end of the semester.

4. The University Appeals committee shall consist of faculty and at least one student.
5. Individuals may not participate as a member of the University Appeals Committee in review of an appeal if they are a participant in the appeal.
6. The decision of the University Appeals Committee is final.
7. If a student is a candidate for graduation, the grade appeal must be initiated 30 days from the last day of the semester. The Office of the Registrar must be notified in writing of the intent to appeal the grade. The degree will not be granted until the grade change process has been completed.
8. No grades can be changed for any reason after a degree has been granted.
Grade Appeal Flow Chart and Process

Student must initiate the appeal within the first seven (7) weeks of the first regular semester after the assignment of the grade. If the instructor is the Chair of the department, the VP of Academic Affairs or designee substitutes functionally as the Chair. The University Appeals Committee is comprised of faculty and at least one student. Individuals may not participate if involved in the appeal. The decision of the University Appeals Committee is final.

Student initiates grade appeal

Student directs the appeal to the instructor in writing and copies the Chair by end of 7th week of the semester following the initial grade assignment

Instructor agrees to change the grade and submits a Grade Change Form.

Issue resolved

If the student remains dissatisfied, s/he makes appointment with the Program Chair. Chair responds in writing to student by the end of the ninth week of the semester*

Instructor has 2 weeks to respond to the student in writing and cc's the Chair. If the instructor does not respond within the 2 week period the Chair may act on behalf of the instructor

Instructor decides to stay with his/her original grade for the student

University Appeals Committee forwards student's statement to the instructor and requests a response with a specific response date

The Committee makes its decision (including possible grade change) and notifies the student and instructor in writing. The student receives a copy of the instructor's written response by the end of the semester.

The Committee reviews the Student and Instructor's statements. The committee may request additional information from student or instructor.

If the student remains dissatisfied, s/he must submit the written appeal to the University Appeals Committee through the Office of Academic Affairs (Dean's Office) by the end of the eleventh week of the semester.

* = The Chair and/or VP of Academic Affairs cannot change the grade, but will discuss the issue with the instructor and provide a written response to the student.
Organization of the Nursing Program

The organizational structure of the Nursing Program is discussed below and is subject to approval of faculty. The Nursing Program's standing committees meet twice per month and include Curriculum and Student Affairs Committee and Faculty. Due to the small size of the initial faculty, membership on the Curriculum and Admissions may include the faculty as a whole. School committees function as fact-finding, advisory, and coordinating bodies consistent with university policies. The Director appoints faculty members to the Committees.

Committees

Faculty/ Curriculum Committee provides the structure for the governance of the Nursing Program. The faculty members review and revise school academic policies, develop and revise curriculum develop and approve policies relative to grading, reviews petition for readmission into the department and evaluation of student performance. Students who attend these committee meetings are not voting members, but are valued for the ability to articulate the views of the student body and to enhance two-way communication between the faculty and students. Two student representatives from level I, II are members of the committee.

Student Affairs Committee is responsible for coordination of student group functions and activities, maintaining channels of communication between faculty and students, coordination of student recruitment activities, coordination of volunteer activities, coordination of scholarships and awards. Two student representatives from level I, II President and Vice President of CSUCI Student Nurses Association are members of the committee.

Advisory Board
The nursing department Advisory Board functions to advise the nursing faculty of changes nursing practice in the surrounding healthcare community and to provide assistance with strategic planning and directions for the program. The board also assists with financial support to increase the visibility and knowledge of the activities of the nursing department and assists in communication of the nursing program projects and new programs to the surrounding community including friends, alumni and others interested in nursing in Ventura County. The board provides opportunities to collaborate with the surrounding community college nursing programs and provide opportunities for employment for CSU Channel Islands in the surrounding community. The board collaborates to offer preceptor and work study experiences for CSU Channel Islands Nursing Students. The Nursing Advisory Board meets once yearly.
Extracurricular Activities

California Student Nurses Association (CSUCI – CNSA) will be established as a chapter of the California Nursing Student Association (CSNA) and the National Student Nurses’ Association (NSNA) Inc. Pre-nursing and nursing students participate together forming one student nursing organization. As a student you are encouraged to join the state and national organizations. Information on the NSNA can be found at http://www.nsna.org/ enrollment can be completed online.

Volunteer Activities:
Students are encouraged to enroll in volunteer activities through the simulation lab coordinator. There is a community service form to be filled in to record activities. This form identifies the exact date, time, location, objectives, strategies, and evaluation. Students involved in Volunteer Activities require the student uniform. Volunteer activities will be posted on the bulletin board in the skills lab, announced in class by the Student Affairs committee members, and published on the Nursing Website.

Honors and Awards upon Graduation
Students qualify for University Honors based on the following criteria:

- CSUCI candidate must complete a minimum of 30 units of courses taken at CSUCI for a letter grade and earn a GPA of 3.5 or above in all work taken at CSUCI. Earn the following cumulative grade point averages in all undergraduate courses, including transfer work:
  - Cum Laude 3.5-3.74
  - Magna cum Laude 3.75-3.89
  - Summa cum Laude 3.9-4.0

Students can be selected for the following Mission-Based Awards:

- Outstanding Integrative Approaches Award – granted to a student who exemplifies an education marked by integrative approaches from more than one discipline
- Outstanding Experiential and Service Learning Award – granted to a student who exemplifies an education marked by experiential and service learning
- Outstanding Multicultural Perspective Award – granted to a student who demonstrate a widening of multicultural perspectives
- Outstanding International Perspective Award – granted to a student who demonstrate a widening of international perspectives

Students who qualify can receive the Silver Dolphin Award based on the following criteria:

- Achieve excellent in academic (3.2 or higher)
- Maintained regular attendance at co-curricular activities
- Participate regularly in service to the CI community and surrounding communities
- Demonstrated commitment to and growth in each of the Dimensions of Development
- Upheld the standards listed in the CSUCI Student Leaders’ Personal Code of Honor
Student may be recognized in the **Who's Who Among Students** for their work as a scholar and in community service.

In addition each Program recognizes students in each major for the **Program Honors**. These students, selected by the faculty in the discipline, are honored for distinguished academic work in the major.
Appendices
Code of Ethics for Nurses

The American Nurses Association House of Delegates approved nine provisions for the Code of Ethics for Nurses in July 2001. The following are the nine provisions:

1. The nurse, in all professional relationships, practices with compassion and respect for the inherent dignity, worth and uniqueness of every individual, unrestricted by the consideration of social or economic status, personal attributes, or the nature of the health care problems.
2. The nurse’s primary commitment is to the patient, whether an individual, family, group or community.
3. The nurse promotes, advocates for, and strives to protect the health, safety, and rights of the patient.
4. The nurse is responsible and accountable for individual nursing practice and determines the appropriate delegation of tasks consistent with the nurse’s obligation to provide optimum patient care.
5. The nurse owes the same duties to self as to others, including the responsibility to preserve integrity and safety, to maintain competence, and to continue personal and professional growth.
6. The nurse participates in establishing, maintaining and improving healthcare environments and conditions of employment conductive to the provision of quality health care and consistent with the values of the profession through individual and collective action.
7. The nurse participates in the advancement of the profession through contributions to practice, education, administration and knowledge development.
8. The nurse collaborates with other health professionals and the public in promoting community, national, and international effort to meet health needs.
9. The profession of nursing, as represented by association and their members, is responsible for articulating nursing values, for maintaining the integrity of the professional and its practice, and for shaping social policy.
10. Reprinted with permission from American Nurses Association, Code of Ethics; @2001 American Nurses Publishing.
1443.5. Standards of Competent Performance

A registered nurse shall be considered to be competent when he/she consistently demonstrates the ability to transfer scientific knowledge from social, biological and physical sciences in applying the nursing process, as follows:

(1) Formulates a nursing diagnosis through observation of the client’s physical condition and behavior, and through interpretation of information obtained from the client and others, including the health team.

(2) Formulates a care plan, in collaboration with the client, which ensures that direct and indirect nursing care services provide for the client’s safety, comfort, hygiene, and protection, and for disease prevention and restorative measures.

(3) Performs skills essential to the kind of nursing action to be taken, explains the health treatment to the client and family and teaches the client and family how to care for the client’s health needs.

(4) Delegates tasks to subordinates based on the legal scopes of practice of the subordinates and on the preparation and capability needed in the tasks to be delegated, and effectively supervises nursing care being given by subordinates.

(5) Evaluates the effectiveness of the care plan through observation of the client’s physical condition and behavior, signs and symptoms of illness, and reactions to treatment and through communication with the client and health team members, and modifies the plan as needed.

(6) Acts as the client’s advocate, as circumstances require, by initiating action to improve health care or to change decisions or activities which are against the interests or wishes of the client, and by giving the client the opportunity to make informed decisions about health care before it is provided.

2725. Legislative intent; Practice of nursing defined
(a) In amending this section at the 1973–74 session, the Legislature recognizes that nursing is a
dynamic field, the practice of which is continually evolving to include more sophisticated patient
care activities. It is the intent of the Legislature in amending this section at the 1973–74 session to
provide clear legal authority for functions and procedures that have common acceptance and usage.
It is the legislative intent also to recognize the existence of overlapping functions between
physicians and registered nurses and to permit additional sharing of functions within organized
health care systems that provide for collaboration between physicians and registered nurses. These
organized health care systems include, but are not limited to, health facilities licensed pursuant to
Chapter 2 (commencing with Section 1250) of Division 2 of the Health and Safety Code, clinics,
home health agencies, physicians’ offices, and public or community health services.

(b) The practice of nursing within the meaning of this chapter means those functions, including
basic health care, that help people cope with difficulties in daily living that are associated with
their actual or potential health or illness problems or the treatment thereof, and that require a
substantial amount of scientific knowledge or technical skill, including all of the following:

(1) Direct and indirect patient care services that ensure the safety, comfort, personal hygiene, and
protection of patients; and the performance of disease prevention and restorative measures.

(2) Direct and indirect patient care services, including, but not limited to, the administration of
medications and therapeutic agents, necessary to implement a treatment, disease prevention, or
rehabilitative regimen ordered by and within the scope of licensure of a physician, dentist,
podiatrist, or clinical psychologist, as defined by Section 1316.5 of the Health and Safety Code.

(3) The performance of skin tests, immunization techniques, and the withdrawal of human blood
from veins and arteries.

(4) Observation of signs and symptoms of illness, reactions to treatment, general behavior, or
general physical condition, and (A) determination of whether the signs, symptoms, reactions,
behavior, or general appearance exhibit abnormal characteristics, and (B) implementation, based
on observed abnormalities, of appropriate reporting, or referral, or standardized procedures, or
changes in treatment regimen in accordance with standardized procedures, or the initiation of
emergency procedures.

(c) “Standardized procedures,” as used in this section, means either of the following:

(1) Policies and protocols developed by a health facility licensed pursuant to Chapter 2
(commencing with Section 1250) of Division 2 of the Health and Safety Code through collaboration
among administrators and health professionals including physicians and nurses.

(2) Policies and protocols developed through collaboration among administrators and health
professionals, including physicians and nurses, by an organized health care system which is not a
health facility licensed pursuant to Chapter 2 (commencing with Section 1250) of Division 2 of the
Health and Safety Code.

The policies and protocols shall be subject to any guidelines for standardized procedures that the
Division of Licensing of the Medical Board of California and the Board of Registered Nursing may
jointly promulgate. If promulgated, the guidelines shall be administered by the Board of Registered Nursing.

(d) Nothing in this section shall be construed to require approval of standardized procedures by the Division of Licensing of the Medical Board of California, or by the Board of Registered Nursing.

(e) No state agency other than the board may define or interpret the practice of nursing for those licensed pursuant to the provisions of this chapter, or develop standardized procedures or protocols pursuant to this chapter, unless so authorized by this chapter, or specifically required under state or federal statute. “State agency” includes every state office, officer, department, division, bureau, board, authority, and commission.

(Added Stats 1939 ch 807 § 2. Amended Stats 1968 ch 348 § 1; Stats 1974 ch 355 § 1, ch 913 § 1; Stats 1978 ch 1161 § 172; Stats 1980 ch 406 § 1; Stats 1989 ch 886 § 52; Stats 1995 ch 279 § 15 (AB 1471); Stats 1996 ch 124 § 2 (AB 3470). Amended Stats 2003 ch 640 § 5 (SB 358).)

2725.1. Dispensation of drugs or devices by registered nurse

Notwithstanding any other provision of law, a registered nurse may dispense drugs or devices upon an order by a licensed physician and surgeon if the nurse is functioning within a licensed clinic as defined in paragraphs (1) and (2) of subdivision (a) of Section 1204 of, or within a clinic as defined in subdivision (b) or (c) of Section 1206, of the Health and Safety Code.

No clinic shall employ a registered nurse to perform dispensing duties exclusively. No registered nurse shall dispense drugs in a pharmacy, keep a pharmacy, open shop, or drugstore for the retailing of drugs or poisons. No registered nurse shall compound drugs. Dispensing of drugs by a registered nurse, except a certified nurse-midwife who functions pursuant to a standardized procedure or protocol described in Section 2746.51 or a nurse practitioner who functions pursuant to a standardized procedure described in Section 2836.1, or protocol, shall not include substances included in the California Uniform Controlled Substances Act (Division 10 (commencing with Section 11000) of the Health and Safety Code). Nothing in this section shall exempt a clinic from the provisions of Article 13 (commencing with Section 4180) of Chapter 9.

(Added Stats 1986 ch 493 § 1. Amended Stats 1999 ch 83 § 3 (SB 966) (ch 914 prevails), ch 914 § 1 (AB 1545); Stats 2001 ch 289 § 2 (SB 298).)

2725.3. Functions performed by unlicensed personnel

(a) A health facility licensed pursuant to subdivision (a), (b), or (f), of Section 1250 of the Health and Safety Code shall not assign unlicensed personnel to perform nursing functions in lieu of a registered nurse and may not allow unlicensed personnel to perform functions under the direct clinical supervision of a registered nurse that require a substantial amount of scientific knowledge and technical skills, including, but not limited to, any of the following:

(1) Administration of medication.
(2) Venipuncture or intravenous therapy.

(3) Parenteral or tube feedings.

(4) Invasive procedures including inserting nasogastric tubes, inserting catheters, or tracheal suctioning.

(5) Assessment of patient condition.

(6) Educating patients and their families concerning the patient’s health care problems, including postdischarge care.

(7) Moderate complexity laboratory tests.

(b) This section shall not preclude any person from performing any act or function that he or she is authorized to perform pursuant to Division 2 (commencing with Section 500) or pursuant to existing statute or regulation as of July 1, 1999.

(Added Stats 1999 ch 945 § 2) (AB 394).

Revised 05/24/11
CSU Channel Islands BSN Program
Request for a Letter of Recommendation from a Nursing Faculty Member

Date of Request: _______________ Instructor: _______________________________

Student Name: ___________________ Email: ________________________________

Student Address: _________________________________________________________

Date Letter Needed: ______________________

___ Letter to be mailed to student at home (Must include stamped, self-addressed envelope)
___ Letter to be picked up in Nursing Program

___ Letter to be picked up in faculty member’s mailbox (outside door)

Please list the semester, year and course in which you completed the class of the above instructor:

Didactic: ______________________

Clinical: ______________________

Please provide the following information concerning the letter and the person to whom the letter is to be addressed:

Name: _________________________ Title: _______________________

Facility Name and Address:
____________________________________________________________________________________________
____________________________________________________________________________________________

Purpose of the letter (employment, scholarship, internship etc.)

Specific information you would like included in the letter: (Include volunteer activities and hours, student nurses association, committee work, tutoring etc.)
____________________________________________________________________________________________
____________________________________________________________________________________________
____________________________________________________________________________________________

Please allow at least 2 weeks minimum for processing. Please personally contact the instructor prior to the submission of this form.
CSU Channel Islands BSN Program  
Policy and Procedure Regarding Student Pregnancy

CSUCI Nursing Program requires the student who is pregnant:

1. Notify the Clinical Faculty and the Nursing Program Director of her pregnancy.
2. Submit a medical release form from her physician indicating the advisability of continuing in the program and stating that she may participate in all clinical activities without restriction. (Take the list of Nursing Student Physical Requirements included in this handbook for the Health Care Provider to review)
3. If she elects to continue in the nursing program she accepts full responsibility for any risks to herself and the fetus.
4. Sign a waiver (below) indicating acknowledgement of responsibilities for the potential risks to herself and the fetus while working in the clinical facility; releasing the college and health care facility of any responsibility during this time.
5. Understand that some clinical facilities may not allow a pregnant student depending on the length of gestation and the clinical setting. If the student cannot complete the clinical objectives she must withdraw from the program.

As a student currently enrolled in the CSUCI BSN Program, I have read and agreed with the above policy and procedure on pregnancy and accept full responsibility for risks to myself and fetus.

CSU Channel Islands BSN Program

30 Unit Option Waiver

Please complete this form and return to the Nursing Program Director

Name ________________________________ Date __________________

I have been counseled by the Nursing Program Director and I understand that 30 unit option LVN does not meet the requirements for the Baccalaureate of Science in Nursing Degree. Students completing this program will not be a graduate of the University’s nursing program and cannot receive the program’s pin or diploma. Additionally, many states in the United States do not recognize persons completing this option as being a Registered Nurse. Thus, many states will not grant reciprocity (licensure by endorsement) to 30 Unit LVN students who have successfully passed the NCLEX-RN examination. The licensure resulting from completion of this option cannot be changed at a later date.

CSU Channel Islands Nursing Program

ATI Remediation Policy

Background: The nursing program at CSUCI has your complete success as its top priority. To that end, we utilize a comprehensive program of quality assessment called ATI Assessment Technologies, Inc.). These twelve sets of modules and exams have been proven to increase student success in both program content and NCLEX pass rates (www.atitesting.com). Prior to entering the program you have already been introduced to the TEAS. Your first semester you will be taking the Critical Thinking Entrance and your last semester The Critical Thinking Exit for a personal comparison. Each Content Mastery Series module follows the program algorithm for testing and, if necessary, remediation and retesting. These courses include Fundamentals, Pharmacology, Medical-Surgical Nursing, Mental Health, Maternal-Newborn, Nursing Care of Children, Leadership and Management, and Community Health Nursing and Transitions to Professional Nursing Practice. And has designated benchmarks to predict the likelihood of passing the NCLEX-RN. We encourage you to ask your faculty any questions you may have regarding ATI and this comprehensive program.

Policy: Use of ATI Comprehensive Package: To prepare the student for the final ATI examination each course should include orientation to the non-proctored exam and study guide in the first week of class. A proctored exam should be required within the last month of class(or in the summer after 75% of the course content has been completed) a remediation plan then will be developed which is to be completed before the final exam or as outlined in the course syllabi

An ATI test is worth 5% of the total grade in a course for which it is assigned. The following is the point systems for ATI Exam

Course Points for ATI Exam Assigned by Proficiency Level and Remediation

</tr>
</tbody>
</table>

(see Remediation Procedure next page)
**Remediation Procedure:** Use of ATI Comprehensive Package: To prepare the student for the final ATI examination each course should include orientation to the non-proctored exam and study guide in the first week of class. A proctored exam should be required three weeks before the end of class (or in the summer after 75% of the course content has been completed) a remediation plan then will be developed which is to be completed before the final exam.

The following remediation is required for students scoring **Proficiency Below Level 2**. All activities must be completed before the start of finals week of the semester in which the ATI exam failure occurred.

**CSU Channel Islands Department of Nursing Remediation Study Plan**

Complete the following to support learning success on the ATI exam, the courses involved and ultimately the NCLEX exam.

Remediation Plan for Below Level 2 Score on ATI Content Area Exams:

- Identify basis for inadequate performance on the ATI exam. Include comments on test-taking skills, time management, test anxiety and study efforts.
- Focused Review: Go to www.atitesting.com and select My Results. Select all Topics to Review. Review areas of weakness relative to the identified course.
- Complete a summary of your activities which includes:
  1. Areas of weakness
  2. Content Reviewed
  3. Self identified goals/summary for success

Name
Course

  1. Areas of weakness
  2. Content Reviewed
  3. Self identified goals/summary for success

Completed remediation study plan is to be submitted to the faculty/instructor before the final exam.
CSU Channel Islands BSN Program

Acknowledgement policies, procedures and guideline

I have read and understand the policies, procedures and requirements in the CSU Channel Islands Nursing Program Handbook, and I understand that my eligibility to participate in this program may be terminated if I cannot meet these expectations.

I also understand that policies, procedures and guidelines may be altered by the faculty/curriculum committee. I am aware that there is student representation in the faculty/curriculum committee. Any changes in policies, procedures and guidelines will be made available to the students on the Nursing Program Website under admitted students.
